8xx Fields

Chapter Summary

8xx  Introduction  8:2
800  Series Added Entry–Personal Name  8:3
810  Series Added Entry–Corporate Name  8:5
811  Series Added Entry–Meeting Name  8:7
830  Series Added Entry–Uniform Title  8:9
84x-87x  Holdings Data Embedded in Bibliographic Records General Information  8:12
850  Holding Institution  8:13
851  Physical Location  8:14
852  Location  8:16
856  Electronic Location and Access  8:22
882  Replacement Record Information  8:30
886  Foreign MARC Information Field  8:31
887  Non-MARC Information Field  8:33
891  Publication Pattern Data  8:34
896  Local Series Added Entry–Personal Name  8:39
897  Local Series Added Entry–Corporate Name  8:41
898  Local Series Added Entry–Meeting Name  8:43
899  Local Series Added Entry–Uniform Title  8:45
**8xx Introduction**

**8xx fields**

Use fields 800–830 for series added entries when the series added entry differs from the series statement or when the series statement is in a note. Use fields 800, 810 and 811 for series added entries in name/title form.

Use field 830 for series added entries in title form. See “4xx Introduction” for information on printing series information.

When adding a heading that is nonstandard and meaningful only for your institution, use the fields below, which are retained in institution records, but not in master records.

- 896 Local Series Added Entry–Personal Name (R)
- 897 Local Series Added Entry–Corporate Name (R)
- 898 Local Series Added Entry–Meeting Name (R)
- 899 Local Series Added Entry–Uniform Title (R)

**Obsolete 4xx fields**

Fields 400, 410, and 411 are obsolete. OCLC has run a database scan to convert them. Records containing these fields fail validation. You may find these fields in local systems in records used prior to this change.

**Current cataloging**

If you are inputting current cataloging, construct entries according to *Anglo-American Cataloguing Rules*, second edition (AACR2) and Library of Congress (LC) practice. Search the OCLC Authority File to verify forms of entry.

Use current LC-AACR2 or AACR2-compatible forms of names and uniform titles. If the current LC-AACR2 or AACR2-compatible form is unknown, construct the heading according to AACR2 and the *Library of Congress Rule Interpretations* (LCRIs).

**Retrospective cataloging**

If you are inputting retrospective cataloging, search the OCLC Authority File to verify forms of entry.

Use current LC-AACR2 or AACR2-compatible forms of names and uniform titles. If the current LC-AACR2 or AACR2-compatible form is unknown, you may enter the pre-AACR2 form, but you are encouraged to construct the heading according to AACR2 and the LCRIs.

See section 2.2, “Transcribing Pre-AACR2 Copy,” for more information.

Definition
A name/title series added entry in which the author portion is a personal name. Use when the added entry form of a series is different from that in the corresponding series statement. Field 800 is usually justified by a series statement (field 490) or a general note (field 500) relating to the series. For reproductions, it may be justified by a series statement in field 533 (Reproduction Note), subfield ‡f. Use for the following types of personal names:

- Names of persons capable of authorship
- Phrases having the structure of forenames or surnames. Use this type of entry if a phrase characterizes an author and is the only clue to the author’s identity
800 Series Added Entry—Personal Name (R) (cont.)

- Names of families

See the Input Standards table for a list of indicator values and subfields and field 100 for instructions and additional examples.

**Examples**

800 1 Armstrong, Louis, ‡d 1900-1971. ‡4 prf ‡t Louie Armstrong (Universal City Studios); ‡v 6.

800 1 Bach, Johann Sebastian, ‡d 1685-1750. ‡t Sonaten und Partiten, ‡m violin, ‡n BWV 1001-1006 (Temerson).

800 1 Berenholtz, Jim, ‡d 1957-. ‡t Teachings of the feathered serpent; ‡v bk. 1.

800 1 Donaldson, Stephen R. ‡t Chronicles of Thomas Covenant, the Unbeliever; ‡v bk. 1.

800 1 Joyce, James, ‡d 1882-1941. ‡t James Joyce archive.

800 1 McCaffrey, Anne. ‡t Dragonriders of Pern.

800 1 Poe, Edgar Allan, ‡d 1809-1849. ‡t Works. ‡l German. ‡f 1922. ‡s Rosl; ‡v 1. Bd.

800 1 Shakespeare, William, ‡d 1564-1616. ‡t Works. ‡f 1984. ‡s Cambridge University Press.

800 1 Sousa, John Philip, ‡d 1854-1932. ‡t Marches, ‡m band. ‡k Selections (Sousa American bicentennial collection); ‡v v. 1.

Definition
A name/title series added entry in which the author portion is a corporate name. Use when the added entry form of a series is different from that in the corresponding series statement. An 810 field is usually justified by a series statement (field 490) or a general note (field 500) relating to the series. For reproductions, it may be justified by a series statement in field 533 (Reproduction Note), subfield ‡f.

Corporate names are the names of agencies, associations, businesses, firms, governments, institutions, nonprofit enterprises, performing groups, etc. Use for the following types of corporate names:
- Organized bodies entered directly under their own names
- Organized bodies entered under names of political jurisdictions
- Political jurisdictions standing alone
Special corporate names, such as names of abbeys, cathedrals, churches, denominations, monasteries, missions, musical groups, parishes, priories, programs, studies and vessels (e.g., Catholic Church, Dire Straits (Musical group), Monasterio Las Descalzas (Lima, Peru), New York Philharmonic, or Writers’ Program)

Names of conferences, conventions, exhibitions, expeditions, festivals and meetings entered indirectly, that is, under the name of a corporate body (e.g., Labour Party (Great Britain). Conference)

See the Input Standards table for a list of indicator values and subfields and field 110 for instructions and additional examples.

**Examples**

810 1 United States. ‡b Dept. of the Army. ‡t Field manual.

810 2 Central Institute of Indian Languages. ‡t CIIL linguistic atlas series ; ‡v 1.

810 2 John Bartholomew and Son. ‡t Bartholomew world travel series ; ‡v 10.

Definition
A name/title series added entry in which the author portion is a meeting or conference name. Use when the added entry form of a series is different from that in the corresponding series statement. An 811 field is usually justified by a series statement (field 490) or a general note (field 500) relating to the series. For reproductions, it may be justified by a series statement in field 533 (Reproduction Note), subfield ‡f. Series added entries for meetings entered subordinately to a corporate body are recorded in field 810.

Conference or meeting names are the names of athletic contests, conferences, exhibitions, expositions, festivals, meetings and scientific expeditions. See “4xx Introduction” for more information.

See the Input Standards table for a list of indicator values and subfields and field 111 for instructions and additional examples.
811 Series Added Entry–Meeting Name (R) (cont.)

**Examples**

811 2 Conference of Latin Americanist Geographers. ¶t Publication series ; ¶v v. 1.

811 2 Delaware Symposium on Language Studies. ¶t Delaware symposia on language studies ; ¶v 4.

## Definition

A title series added entry in which the entry of the series is under a uniform title. Use when the added entry form of a series title is different from that in the corresponding series statement. An 830 field is usually justified by a series statement (field 490) or a general note (field 500) relating to the series. For reproductions, it may be justified by a series statement in field 533  (Reproduction Note), subfield ‡f. Use for the following types of uniform titles:

- Anonymous works
- Composite manuscripts or manuscript groups
- Concordats
- Names of journals and newspapers
- Radio and television programs
- Motion pictures and videorecordings
- Treaties and inter-governmental agreements

See “4xx Introduction” for more information.

### 1st Indicator

**Undefined.** The 1st indicator position is undefined and contains a blank (§).

- Undefined
2nd Indicator Nonfiling characters. The number of character positions associated with a definite or indefinite article (e.g., An or The) at the beginning of a title and that are disregarded in sorting and filing processes.

Current practice is to enter the title without articles and use 2nd indicator value 0.

0 No nonfiling characters. No initial article character positions are disregarded. Use value 0 if the title does not begin with an article.

830 0 Collection africaine

Diacritical marks or special characters at the beginning of a series statement field that does not begin with an initial article are not counted as nonfiling characters.

830 0 Ökonomische Studien; ‡v Bd. 22

1-9 Number of nonfiling characters present. A field begins with a definite or indefinite article that is disregarded in sorting and filing processes. Enter the number of characters in the article, plus spaces, punctuation, diacritical marks and special characters that precede the first significant word.

Any diacritical mark or special character associated with the first filing character is not included in the count of nonfiling characters.

Subfields

‡a Uniform title The uniform title. Enter parenthetical information added to make a title distinctive in subfield ‡a. Use subfield ‡d to record the date of signing added to a uniform title for a treaty.

830 0 Imago (Series)

‡d Date of treaty signing The date of signing for a treaty or other intergovernmental agreement.

‡f Date of a work The date of publication used with a title of a work.

830 0 Bible. ‡l English. ‡s Anchor Bible. ‡f 1964.

‡g Miscellaneous information Data not identified in other subfields.

‡h Medium Do not use.

‡k Form subheading Standardized phrases added to a heading to gather records for certain kinds of materials. Form subheadings include: Manuscript; Protocols, etc.; Selections.

830 0 Koran. ‡l English. ‡k Selections.

‡l Language of a work The name of the language or the term representing the language (e.g., Polyglot) of a work.

830 0 Treaty on the Non-proliferation of Nuclear Weapons ‡d (1968). ‡l Spanish. ‡f 1977.

‡m Medium of performance for music Terms designating the medium of performance.

830 0 Concertos, ‡m violin, string orchestra.

[Uniform title heading is used for a work of unknown authorship.]

Definition

Holdings data information embedded in the bibliographic record. The 84x–87x fields are holdings fields. Holdings data elements included in the bibliographic record are captions and patterns, enumeration and chronology, textual holdings and item information. The 84x–87x fields are just listed here. For full descriptions of these fields, see MARC 21 Format for Holdings Data (http://www.loc.gov/marc/holdings/echdhome.html). The holdings format should be consulted for field descriptions and information concerning the inclusion of fields 841–845, 853–855, 863–868 and 876–878.

Note: OCLC is not defining fields 842 (Textual Physical Form Designator) and 844 (Name of Unit) because they cannot be embedded in bibliographic records.

Guidelines

Field 852 does not remain in the master record. It is retained in archive records, institution records, exported records and OCLC-MARC records.

Do not input holdings data in these fields without first consulting your local system administrator. Detailed holdings information can also be entered in local holdings records. Information about local holdings records can be found on the Local Holdings Maintenance documentation page (http://www.oclc.org/support/documentation/localholdings/default.htm).

Printing

**Definition**
This field contains detailed information on the location of the holdings. In contrast to field 850, field 851 allows the recording of the full name and address of the holding institution and specific data about the exact location of the item.

The custodian and the owner of a work are usually the same and are recorded in field 851 for these kinds of items:

- Original or historical graphic material
- Three-dimensional artifacts
- Naturally occurring objects

When an item is not at the owner’s address, the name of the current custodian is recorded in subfield ‡a and the owner’s name and address are recorded in field 561. If a work was originally commissioned/installed at one site but was subsequently moved to another location, the name of the present site is recorded in subfield ‡b and the name of the original site is recorded in field 561.

1st Indicator  Undefined.

2nd Indicator  Undefined.

Subfields

‡a Name, custodian or owner
The name of the person or corporation with whom the item is currently located, frequently the owner. When the item is not located at the owner’s address, the name of the current custodian is recorded in subfield ‡a and the owner’s name is recorded in field 561.

851 National Archives and Records Service ‡b Genealogical Research Recording ‡c Pennsylvania Ave. at 8th St., N.W., Washington, DC ‡d USA ‡g dcu

‡b Institutional division
The name of the institutional division, or a subordinate unit where the item is currently located. If an item was originally commissioned/installed at one site but
was subsequently moved to another location, the name of the current site is recorded in this subfield; the name of the original site is recorded in field 561.

851 National Geographic Society ‡b Personnel Dept. ‡c 17th and M St., N.W., Washington, DC ‡d USA

tc Street address The street address of the current location.

851 Smithsonian Institution ‡b National Museum of American Art ‡c 8th and G Streets, N.W., Washington, DC 20561 ‡d USA ‡g dcu

td Country The name of the country of the current location.

851 National Gallery of Art ‡c 6th and Constitution Avenues, N.W., Washington, DC 20565 ‡d USA

te Location of units The specific location of the item.

tf Item number The item number, if any.

851 Library of Congress ‡b Manuscript Division ‡c James Madison Building, 1st and Independence Ave. S.E., Washington, DC ‡d USA ‡g dcu ‡f 4016

tg Repository location code The two or three character code for the country, Canadian province, or US state of the repository holding the originals or duplicates of the material. See MARC Code List for Countries (http://www.loc.gov/marc/countries/cntrhome.html).

851 Library of Congress ‡b Manuscript Division ‡c James Madison Building, 1st and Independence Ave. S.E., Washington, DC ‡d USA ‡g dcu

‡3 Materials specified The part of the described materials to which the field applies.

851 ‡3 Correspondence ‡a Jefferson County Historical Society ‡b Manuscript Division

Printing Field 851 does not print.
## 852 Location (R)

### Input Standards
Optional/Optional

**1st Indicator** Shelving scheme
- 0: No information provided
- 1: Library of Congress classification
- 2: Dewey Decimal classification
- 3: National Library of Medicine classification
- 4: Superintendent of Documents classification
- 5: Shelving control number
- 6: Shelled separately
- 7: Source specified in subfield ‡2
- 8: Other scheme

**2nd Indicator** Shelving order
- 0: No information provided
- 1: Not enumeration
- 2: Primary enumeration
- 3: Alternative enumeration

</table>
Definition

The information required to locate an item. Use to identify the institution holding the item or from which institution the item is available. Use also for detailed information to locate the item within a collection. Repeat field 852 when holdings are reported for multiple copies of an item and the location data elements vary.

Field 852 does not remain in the master record. It is retained in archive records, institution records, exported records and OCLC-MARC records.

1st Indicator

**Shelving scheme.** The scheme used to shelve a bibliographic item in the collections of the reporting organization.

| 1 | No information provided. Shelving scheme information is not provided. |
| 0 | Library of Congress classification. The item is shelved by a Library of Congress classification number. Use subfield ‡h to indicate this number. The source of this number is either *Library of Congress Classification* schedules or *LC Classification–Additions and Changes*. |
| 1 | Dewey Decimal classification. The item is shelved by a Dewey Decimal classification number. Use subfield ‡h to indicate this number. The source of this number is *Dewey Decimal Classification and Relative Index*, the *Abridged Dewey Decimal Classification and Relative Index*, or the *DC&: Dewey Decimal Classification Additions, Notes and Decisions*. |
| 2 | National Library of Medicine classification. The item is shelved by a U.S. National Library of Medicine classification number. Use subfield ‡h to indicate this number. The source of this number is the *National Library of Medicine Classification* schedules QS–QZ and W or the *Library of Congress Classification* schedules used by the National Library of Medicine. |
| 3 | Superintendent of Documents classification. The item is shelved by a U.S. Superintendent of Documents classification number. Use subfield ‡h to indicate this number. The source of this number is the U.S. Government Printing Office’s *Superintendent of Documents Classification System*. |
| 4 | Shelving control number. The item is shelved by a shelving control number (subfield ‡j). |
| 5 | Title. The item is shelved by a title (subfield ‡l). |
| 6 | Shelved separately. The part of the item is shelved separately because the parts are classed separately. |
| 7 | Source specified in subfield ‡2. The item is shelved by a classification number in a scheme other than that specified by one of the other defined values and for which an identifying MARC code is given in subfield ‡2. The source of the code is *MARC Code Lists for Relators, Sources, Descriptive Conventions* (http://www.loc.gov/marc/relators/relahome.html). |
| 8 | Other scheme. The shelving scheme is known, but is not specified. |

2nd Indicator

**Shelving order.** The value that indicates whether an item is shelved under a primary or alternative numbering scheme. The distinction is necessary when an item carries two numbering schemes. The numbering scheme may be an alphabetical, numerical or chronological designation.

| 1 | No information provided. The shelving order is not provided. |
0 Not enumeration. The item is not shelved by enumeration.

1 Primary enumeration. The item is shelved by its primary enumeration. Use value 1 also when the item has only one numbering scheme.

2 Alternative enumeration. The item carries two numbering schemes and is shelved by the secondary scheme.

Subfields

‡a Location

The MARC code of the holding institution or the name of the institution or person from which access is given. For U.S. institutions, the source of the code is MARC Code List for Organizations (http://www.loc.gov/marc/organizations/orgshome.html). For Canadian institutions, the codes are formulated by adding the prefix Ca to codes found in Symbols and Interlibrary Loan Policies in Canada (http://www.nlc-bnc.ca/6/16/s16-202-e.html).

A sublocation within an organization is contained in subfield ‡b. To differentiate between subfields ‡a and ‡b, use subfield ‡a for the name to be addressed in external communication and subfield ‡b for the name within the institution.

If the bibliographic item is physically located somewhere other than the location identified in subfield ‡a, use subfield ‡x or ‡z to identify the physical location. If the item is owned by an institution or individual other than the one identified in subfield ‡a, use subfield ‡x or ‡z or field 561 (Ownership and Custodial History) to identify the actual owner.

852 CLU

‡b Sublocation or collection

The name of the organizational division of the organization identified in subfield ‡a or the name of the collection in which the item is located or from which it is available. Use a full name or a standardized abbreviated or coded form.

Repeat subfield ‡b to indicate the organizational hierarchy of the sublocation. Repeat field 852 for each sublocation when multiple copies of an item having the same call number are housed in various sublocations or when parts of a copy are split among several locations.

852 0 CaABA ‡b Manuscript Division

‡c Shelving location

The physical location of the item within the collection. Use also for the physical location within a sublocation (e.g., oversize shelving or reference alcove).

852 81 CaABA ‡b Main ‡c mezzanine stacks

‡d Former shelving location

Call numbers/shelf numbers where a resource was previously located, in cases of a relocation or a reordering/ reorganization of a collection as a whole.

852 8 [location identifier] ‡c N. Mus. ms. 2234 ‡d Mus. ms. pr. XII/911 ‡d 13.492

‡e Address

The complete address and country information for the principal location identified in subfield ‡a. Subfield ‡e may be repeated to separate the parts of an address.

852 National Geographic Society ‡b Personnel Dept. ‡e 17th & M St., N.W., Washington, DC, USA

‡f Coded location qualifier

A two- or three-character code that identifies the specific issues of the item that are housed in a location different from that of the main holdings of the same item. A
two-character code is composed of a Qualifier Type code and a Unit Type code. A three-character code is composed of a Qualifier Type code, the Number of Units and a Unit Type code. Use the following codes:

<table>
<thead>
<tr>
<th>Qualifier Type</th>
<th>Number of Units</th>
<th>Unit Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Time</td>
<td>Week(s)</td>
<td>Editions</td>
</tr>
<tr>
<td>Time</td>
<td>Month(s)</td>
<td>Issues</td>
</tr>
<tr>
<td>Time</td>
<td>Year(s)</td>
<td>Supplement(s)</td>
</tr>
</tbody>
</table>

The Qualifier Type identifies whether it is the latest or previous time or part unit that is housed in a different location. Use \( p \) to indicate that the previous, not including the current, time or part units is housed in a different location. Use \( l \) to indicate that the latest, including the current, time or part units is housed in a different location.

The Number of Units identifies the number of time or part units that are housed in a different location. When a number is not required to identify the specific units, the number of units may be omitted. If the number of time or parts units exceeds 9, use subfield \( \textit{‡g} \).

The Unit Type identifies either the time or part unit that is housed in a different location.

If the location qualifier cannot be expressed in coded form, use \( \textit{‡g} \).

\[
852 01 \text{ DLC \( \textit{‡b} \) MRR Ref \( \textit{‡f} \) l2y} \\
\text{[The Library of Congress houses the item in its Serial Division area except for the latest two years which are in the Main Reading Room Reference collection.]} 
\]

\( \textit{‡g} \) Noncoded location qualifier

A textual description that identifies the specific units of an item that are housed in a location different from that of the main holdings of the same item when the location qualifier cannot be expressed in coded form in subfield \( \textit{‡f} \).

\[
852 81 \text{ CEDA-HA \( \textit{‡b} \) Ref \( \textit{‡g} \) holographic issue} \\
\text{[Only this special issue is housed in Reference.]} 
\]

\( \textit{‡h} \) Classification part

The classification part of the call number used as the shelving scheme for an item. Use subfield \( \textit{‡i} \) to identify a Cutter, date or term that is added to the classification to distinguish one item from any other item assigned the same classification. Use subfield \( \textit{‡k} \) to identify a call number prefix.

\[
852 81 \text{ FrPALP \( \textit{‡h} \) Per \( \textit{‡i} \) REF} 
\]

\( \textit{‡i} \) Item part

A Cutter, date or term that is added to the classification recorded in subfield \( \textit{‡h} \) to distinguish one item from any other item assigned the same classification. Use subfield \( \textit{‡m} \) to identify a call number suffix.

\[
852 01 \text{ CtY \( \textit{‡b} \) Main \( \textit{‡h} \) LB201 \( \textit{‡i} \) .M63} 
\]

\( \textit{‡j} \) Shelving control number

A shelving control number used as the shelving scheme for an item. The 1st indicator value is 4.

\[
852 4 \text{ DLC \( \textit{‡b} \) MicRR \( \textit{‡j} \) Microfilm 82/528 MicRR} 
\]

**Definition**
The information required to locate and access an electronic item. Use field 856 in a bibliographic record for a resource when that resource or a subset of it is available electronically. In addition, use field 856 to locate and access an electronic version of
856  Electronic Location and Access (R)  (cont.)

a non-electronic resource described in the bibliographic record or a related
electronic resource.

Repeat field 856 when the location data elements vary (the URI in subfield ‡u or
subfields ‡a, ‡b and ‡d, when used) and when more than one access method is used.
Repeat field 856 also when different portions of the item are available
electronically, mirror sites are recorded, different formats/resolutions with different
URIs are indicated and related items are recorded.

1st Indicator

Access method. The access method to the electronic resource. If the resource is
available by more than one access method, repeat the field with data appropriate to
each method. The methods defined are the main TCP/IP (Transmission Control
Protocol/Internet Protocol) protocols.

When recording a URI in subfield ‡u, the value corresponds to the access method
(URI scheme) which is also the first element in the URI string.

b No information provided. No information about the access method is provided.

0 E-mail. Access to the resource is through e-mail. Include information on
subscribing to an electronic journal or electronic forum through software
intended to be used by an e-mail system.

856 0 ‡u mailto:ejap@phil.indiana.edu ‡i ejap subscription

1 FTP. Access to the resource is through File Transfer Protocol (FTP).

856 1 ‡u ftp://path.net/pub/docs/urn2urc.ps

2 Remote login (Telnet). Access to the resource is through remote login (Telnet).
You may include information in the subfields to enable users to connect to the
resource electronically. (This is equivalent to a URI telnet: scheme.)

856 2 ‡u telnet://pucc.princeton.edu ‡n Princeton University, Princeton, N.J.

3 Dial-up. Access to the electronic resource is through a conventional telephone
line (dial up). Use subfields to record information that may enable the user to
connect to the resource.

856 3 locis.loc.gov ‡b 140.147.254.3 ‡m Ieonline@loc.gov ‡t 3270 ‡t line
mode (e.g., vt100) ‡v M-F 6:00 a.m.-21:30 p.m. USA EST, Sat 8:30-
17:00 USA EST, Sun. 13:00-17:00 USA EST

4 HTTP (Hypertext Transfer Protocol). Access to the electronic resource is
through Hypertext Transfer Protocol.

856 40 ‡u http://jefferson.village.virginia.edu PMC/contents.all.htm

7 Method specified in subfield ‡2. Access to the resource is through a method
other than the defined values and for which an identifying code is given in
subfield ‡2.

856 7 ‡3 b&w film copy neg. ‡d dag ‡f 3d01926 ‡2 file

2nd Indicator

Relationship. The relationship between the electronic resource at the location
identified in field 856 and the item described in the record as a whole. Use subfield
‡3 to provide further information about the relationship if it is not a one-to-one
relationship.
856  Electronic Location and Access (R)  (cont.)

- **No information provided.** No information is provided about the relationship of the electronic resource to the bibliographic item described by the record.

0 **Resource.** The electronic location in field 856 is for the same resource described by the record as a whole. In this case, the item represented by the bibliographic record is an electronic resource. If the data in field 856 relates to a constituent unit of the resource represented by the record, use subfield ‡3 to specify the portion(s) to which the field applies. The display constant *Electronic resource:* may be provided.

856 40 ‡u http://lcweb.loc.gov/catdir/semdigdocs/seminar.html

1 **Version of resource.** The location in field 856 is for an electronic version of the resource described by the record. In this case, the item represented by the bibliographic record is not electronic, but an electronic version is available. If the data in field 856 relates to a constituent unit of the resource represented by the record, use subfield ‡3 to specify the portion(s) to which the field applies. The display constant *Electronic version:* may be provided.

245 00 American quarterly.
856 41 ‡u http://muse.jhu.edu/journals/american_quarterly/

2 **Related resource.** The location in field 856 is for an electronic resource related to the bibliographic item described by the record. In this case, the item represented by the bibliographic record is not the electronic resource itself. Use subfield ‡3 to further characterize the relationship between the electronic item identified in field 856 and the item represented by the bibliographic record as a whole. The display constant *Related electronic resource:* may be provided.

Limit use to electronic resources that have a specific bibliographic relationship to the resource described in the body of the record. This would include links to such resources as a finding aid for an archival collection or the Web site of a musical group on a bibliographic record for a sound recording. This would not, however, include Web sites that have merely a general subject relationship to the resource.

245 00 ¶k Papers, ¶f 1932-1970 ¶g (bulk 1932-1965)
856 42 ¶3 Finding aid ‡u http://lcweb2.loc.gov/ammem/ead/jackson.sgm
245 10 White blood cells ¶h [sound recording] / ¶c the White Stripes.
856 42 ¶3 Song lyrics ‡u http://www.whitestripes.com/discs/wbc.html

8 **No display constant generated.** The value that specifies that a display constant is not generated.

**Subfields**

- ‡a **Host name**
  The fully qualified domain (host name) of the electronic location. Repeat subfield ‡a if there is more than one address for the same host.

  856 1 harvarda.harvard.edu ¶a harvarda.bitnet

- ‡b **Access number**
  The access number associated with a host. Use for Internet Protocol (IP) numeric address for an Internet resource. Use for a telephone number if access is through a telephone line (dial up). This data may change frequently and may be generated by
856 Electronic Location and Access (R) (cont.)

the system, rather than statically stored. Repeat subfield ‡b if all the other information in the field applies.

856 2 anthrax.micro.umn.edu ‡b 128.101.95.23

‡c Compression information
The information about the compression of a file. If a specific program is required to decompress the file, it is noted here. Repeat subfield ‡c if two compression programs are used. Enter the latest compression first.

856 1 maine.maine.edu ‡c Must be decompressed with PKUNZIP ‡f resource.zip

‡d Path
The directory and subdirectory names in which the file is stored. Use subfield ‡f for the file name itself. Use subfield ‡d for a surrogate path to the host in which complete and current access information is stored.

856 1 wuarchive.wust1.edu ‡d /aui/admin/CAT.games ‡f mac-qubic.22.hqx

‡f Electronic name
The electronic name of a file as it exists in the directory/subdirectory indicated in subfield ‡d on the host identified in subfield ‡a. Repeat subfield ‡f if a single logical file has been divided into parts and stored under different names. In this case, the separate parts should constitute a single bibliographic item. In all other cases, for a file that may be retrieved under different filenames, use multiple occurrences of field 856, each with its corresponding electronic name in subfield ‡f.

856 1 wuarchive.wust1.edu ‡d mirrors/info-mac/util ‡f color-system-icons.hqx

File names may include wildcard characters (e.g., * or ?). Use subfield ‡z to explain how the files are named.

‡h Processor of request
The user name or processor of the request. Use for the data that precedes the at sign (@) in the host address.

856 0 uicvm.bitnet ‡f AN2 ‡h Listserv

‡i Instruction
The instruction or command needed for the remote host to process a request.

856 0 uccvma.bitnet ‡f IR-L ‡h Listserv ‡i subscribe

‡j Bits per second
The lowest and highest number of bits (binary units) of data that can be transmitted per second when connected to a host.

The syntax for recording the number of bits per second (BPS) is as follows:

<Lowest BPS><Highest BPS>

- If only the lowest is given: <Lowest BPS>-
- If only the highest is given : -<Highest BPS>

856 0 ‡b 1-202-707-2316 ‡j 2400-9600 ‡n Library of Congress, Washington, DC ‡o UNIX ‡r E-7-1

‡k Password
The password required to access the electronic resource. An FTP site may require the user to enter an Internet Protocol address or may require a specific password. Electronically accessed catalogs may also require a password. Use for general passwords, not for security passwords. Omit subfield ‡k if a system that requires a password will accept anything entered as valid. Use subfield ‡z for password instructions.

856 1 harvarda.harvard.edu ‡k guest
### 856 Electronic Location and Access (R) (cont.)

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
<th>Example</th>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>‡l Logon</td>
<td>The characters needed to connect (e.g., logon or login) to an electronic resource or FTP site. An account number required for login may also be indicated. For many general-use File Transfer Protocol servers, access is gained by entering the string anonymous. Use to record general-use logon strings which do not require special security. Do not use for security passwords.</td>
<td>856 1 umnvm.bitnet ‡l anonymous</td>
<td></td>
</tr>
<tr>
<td>‡m Contact for access assistance</td>
<td>The contact person at the host specified in subfield ‡a. For addresses relating to the content of the resource itself (i.e., the item represented by the title recorded in field 245) rather than access assistance, use field 270. Also use field 270, if the address data is the same.</td>
<td>856 2 gopac.berkeley.edu ‡m Roy Tennant</td>
<td></td>
</tr>
<tr>
<td>‡n Name of location of host</td>
<td>The conventional name of the location of the host in subfield ‡a, including its physical (geographic) location.</td>
<td>856 2 pucc.princeton.edu ‡n Princeton University, Princeton, N.J.</td>
<td></td>
</tr>
<tr>
<td>‡o Operating system</td>
<td>The operating system used by the host specified in subfield ‡a. Conventions for the path and filenames may be dependent on the operating system of the host. For the operating system of the resource itself (i.e., the item represented by the title recorded in field 245), use field 753 subfield ‡c.</td>
<td>856 1 seq1.loc.gov ‡d /pub/soviet.archive ‡f k1famine.bkg ‡n Library of Congress, Washington, DC ‡o UNIX</td>
<td></td>
</tr>
<tr>

<td>856 2 madlab.sprl.umich.edu ‡n University of Michigan Weather Underground ‡p 3000</td>
<td></td>
</tr>
<tr>
<td>‡q Electronic format type</td>
<td>The electronic format type which is the data representation of the resource, e.g., text/html, ASCII (American National Standard Code for Information Interchange), executable application, JPEG image or Postscript file. It provides information to allow people or machines to make decisions about the usability of the encoded data (e.g., the hardware or software required to display or to execute the data). The electronic format type also determines the file transfer mode or how the data is transferred through the network. Usually, a text file can be transferred as character data, which generally restricts the text to characters in the ASCII character set (i.e., the basic Latin alphabet, digits 0–9, most punctuation marks and a few special characters). Text files with characters outside the ASCII set or non-textual data (e.g., computer programs or images) must be transferred using another binary mode. Electronic format type may be taken from enumerated lists such as registered Internet Media Types (MIME types).</td>
<td>856 40 ‡u <a href="http://www.cdc.gov/ncidod/EID/eid.htm">http://www.cdc.gov/ncidod/EID/eid.htm</a> ‡q text/html</td>
<td></td>
</tr>
<tr>
<td>‡r Settings</td>
<td>The settings used for transferring data.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Parity: the parity checking technique used. Parity values are:</td>
<td></td>
<td></td>

<tr>
<td></td>
<td>— N for none</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
- **Number Data Bits**: the number of bits per character.
- **Number Stop Bits**: the number of bits to signal the end of a byte.

The syntax is as follows: `<Parity>-<Number Data Bits>-<Number Stop Bits>`

- If only the parity is given, the other elements of settings and their related hyphens are omitted: `<Parity>`
- If one of the other two elements is given, the hyphen for the missing element is recorded in its proper position:
  - `<Parity>-<Number Data Bits>`
  - `<Parity>-<Number Stop Bits>`

856 3 ‡b 1-202-737-2316 ‡j 2400-9600 ‡n Library of Congress, Washington, DC ‡o UNIX ‡r E-7-1 ‡t vt100 ‡z Requires logon and password

### File size

The size of the file stored under the file name indicated in subfield ‡f. Size is generally expressed in terms of 8-bit bytes (octets). Repeat subfield ‡s and place it after the subfield ‡f to which it applies, if needed. Do **not** enter this information for electronic journals since the field relates to the entire title, **not** to a particular issue.

856 0  kepvtm.bitnet ‡f acadlist file1 ‡s 34,989 bytes ‡f acadlist file2 ‡s 32,876 bytes ‡f acadlist file3 ‡s 23,987 bytes

### Terminal emulation

The emulation supported to specify a remote login. Use with 1st indicator value 2.

856 2  maine.maine.edu ‡n University of Maine ‡t 3270

### Uniform Resource Identifier

The Uniform Resource Identifier (URI), for example a URL or URN, provides electronic access data in a standard syntax. Use for automated access to an electronic item using one of the Internet protocols or by resolution of a URN. The structure of field 856 allows for the creation of a URI from the concatenation of the other 856 subfields. Use subfield ‡u instead of those separate subfields or in addition to them. Repeat subfield if digital object has multiple identifiers (URIs).

856 1  ‡u ftp://path.net/pub/docs/urn2urc.ps

**Substituting hexadecimal notation for diacritics and special characters in Uniform Resource Identifiers.** When recording a URI in subfield ‡u, you may enter most of the spacing characters listed below as either characters or their hexadecimal equivalents. Consult the table below.

**Note:** Do not confuse the spacing characters listed below with their long-valid non-spacing counterparts. Use of the spacing characters will be limited almost exclusively to URLs.
The hours that access to the electronic resource indicated in field 856 is available. For systems and services, use field 307, not subfield ‡v.

856 2 pac.carl.org ‡b 192.54.81.128 ‡m CARL Situation Room ‡m help@CARL.org ‡n CARL Systems, Inc., Denver, CO ‡v 24 hours

The system control number of the related record. Precede the number with a MARC code for the agency to which the control number applies. Enclose the MARC agency code in parentheses. The data in subfield ‡w links field 856 to the MARC record having the same data in a control number field. See MARC Code List for Organizations (http://www.loc.gov/marc/organizations/orgshome.html) or Symbols and Interlibrary Loan Policies in Canada (http://www.nlc-bnc.ca/6/16/s16-202-e.html).

A note pertaining to the electronic location of the source identified in the field that is in a form not adequate for public display. A nonpublic note may contain processing information about the file at the location specified.

856 1 wuarchive.wust1.edu ‡c decompress with PKUNZIP.exe ‡d /mirrors2/win3/games ‡f atmoids.zip ‡x cannot verify because of transfer difficulty

The link text that is used for display in place of the URI in subfield ‡u. When subfield ‡y is present, applications should use the contents of subfield ‡y as the link, instead of the content of subfield ‡u when linking to the destination in subfield ‡u. Subfield ‡u is independent of the 2nd indicator value.

856 4 ‡u http://fdl.fcla.edu:80/cgi-bin/cgiwrap/fdl/fdleg1/ZKVIEWFA00000011/file2.pdf ‡y Electronic resource (PDF)

A note pertaining to the electronic location of the source identified in the field that is in a form adequate for public display.

856 4 ‡u http://www.ref.oclc.org:2000 ‡z Address for accessing the journal using authorization number and password through OCLC FirstSearch Electronic Collections Online. Subscription to online journal required for access to abstracts and full text

Field 882 does not print.
### 886 Foreign MARC Information Field (R)

**Definition**
Data from foreign MARC records for which there are no corresponding MARC 21 or OCLC-MARC fields. LC and OCLC use field 886 when converting data from foreign MARC records into MARC 21 or OCLC-MARC formats when it is desirable to retain data for which there is no corresponding field or which cannot be accommodated in MARC 21 or OCLC-MARC formats for some other reason.

**1st Indicator**
Type of field.
- **0** Leader. Information from the foreign MARC Leader
- **1** Variable control fields (001–00z). Information from a foreign MARC variable control field.
- **2** Variable data field (010–999 or zzz). Information from a foreign MARC variable data field.

**2nd Indicator**
Undefined. The 2nd indicator position is undefined and contains a blank (b).

Definition

Information about the publication patterns for serials. Guidelines for the use of field 891 are available in the CONSER Guidelines for Input of Caption/Pattern and Holdings Data, 4.1. Use of the OCLC 891 field.

Field 891 embeds the MARC holdings fields 853, 854, 855, 863, 864 and 865. Use subfield ‡9 to record the MARC holding field. Define all other indicators and subfields to correspond to the field recorded in subfield ‡9. Repeat field 891 for every MARC field embedded in subfield ‡9. For more information about the indicators and subfields, see MARC 21 Format for Holdings Data (http://www.loc.gov/marc/holdings/echdhome.html).

1st Indicator

Subfield ‡9 dependent. All indicator values have meaning only within the MARC field definition for the field recorded in subfield ‡9.

‡a, 0-5 Subfield ‡9 dependent. Indicator definition dependent on the field recorded in subfield ‡9.

2nd Indicator

Subfield ‡9 dependent. All indicator values have meaning only within the MARC field definition for the field recorded in subfield ‡9.

‡a, 0-5 Subfield ‡9 dependent. Indicator definition dependent on the field recorded in subfield ‡9.

Subfields

‡a First level of enumeration

The highest level of enumeration.

‡b Second level of enumeration

The second level of enumeration.

Definition
A personal name/title used as a locally devised series added entry. Use when the added entry form of a series is different from that in the corresponding series statement. Field 896 is usually justified by a series statement (field 490) or a general note (field 500) relating to the series. For reproductions, it may be justified by a series statement in field 533 (Reproduction Note), subfield ‡f. Use for the following types of personal names:

- Names of persons capable of authorship
- Phrases having the structure of forenames or surnames. Use this type of entry if a phrase characterizes an author and is the only clue to the author’s identity
- Names of families

See the Input Standards table for a list of indicator values and subfields and field 100 for instructions and additional examples.

**Definition**

A corporate name name/title used as a locally devised series added entry. Use when the added entry form of a series is different from that in the corresponding series statement. An 897 field is usually justified by a series statement (field 490) or a general note (field 500) relating to the series. For reproductions, it may be justified by a series statement in field 533 (Reproduction Note), subfield ‡f.

Corporate names are the names of agencies, associations, businesses, firms, governments, institutions, nonprofit enterprises, performing groups, etc. Use for the following types of corporate names:

- Organized bodies entered directly under their own names
- Organized bodies entered under names of political jurisdictions
- Political jurisdictions standing alone
- Special corporate names, such as names of abbeys, cathedrals, churches, denominations, monasteries, missions, musical groups, parishes, priorities, programs, studies and vessels (e.g., Catholic Church, Dire Straits (Musical group), Monasterio Las Descalzas (Lima, Peru), New York Philharmonic, or Writers’ Program)
- Names of conferences, conventions, exhibitions, expeditions, festivals and meetings entered indirectly, that is, under the name of a corporate body (e.g., Labour Party (Great Britain). Conference)

See the Input Standards table for a list of indicator values and subfields and field 110 for instructions and additional examples.

Definition
A meeting or conference name/title used as a locally devised series added entry. Use when the added entry form of a series is different from that in the corresponding series statement. An 898 field is usually justified by a series statement (field 490) or a general note (field 500) relating to the series. For reproductions, it may be justified by a series statement in field 533 (Reproduction Note), subfield ‡f. Series added entries for meetings entered subordinately to a corporate body are recorded in field 810.

Conference or meeting names are the names of athletic contests, conferences, exhibitions, expositions, festivals, meetings and scientific expeditions. See “4xx Introduction” for more information.

See the Input Standards table for a list of indicator values and subfields and field 111 for instructions and additional examples.

Definition
A uniform title used as a locally devised series added entry. Use when the added entry form of a series title is different from that in the corresponding series statement. An 899 field is usually justified by a series statement (field 490) or a general note (field 500) relating to the series. For reproductions, it may be justified by a series statement in field 533 (Reproduction Note), subfield ‡f. Use for the following types of uniform titles:

- Anonymous works
- Composite manuscripts or manuscript groups
- Concordats
- Names of journals and newspapers
- Radio and television programs
- Motion pictures and videorecordings
- Treaties and inter-governmental agreements

See “4xx Introduction” for more information.

1st Indicator Undefined. The 1st indicator position is undefined and contains a blank (§).

2nd Indicator Nonfiling characters. The number of character positions associated with a definite or indefinite article (e.g., An or The) at the beginning of a title and that are disregarded in sorting and filing processes.

Current practice is to enter the title without articles and use 2nd indicator value 0.
0 No nonfiling characters. No initial article character positions are disregarded. Use value 0 if the title does not begin with an article.

899 0 Collection africaine

Diacritical marks or special characters at the beginning of a series statement field that does not begin with an initial article are not counted as nonfiling characters.

899 0 Ökonomische Studien ; ‡v Bd. 22

1-9 Number of nonfiling characters present. A field begins with a definite or indefinite article that is disregarded in sorting and filing processes. Enter the number of characters in the article, plus spaces, punctuation, diacritical marks and special characters that precede the first significant word.

Any diacritical mark or special character associated with the first filing character is not included in the count of nonfiling characters.

Subfields

‡a Uniform title
The uniform title. Enter parenthetical information added to make a title distinctive in subfield ‡a. Use subfield ‡d to record the date of signing added to a uniform title for a treaty.

899 0 Imago (Series)

‡d Date of treaty signing
The date of signing for a treaty or other intergovernmental agreement.

‡f Date of a work
The date of publication used with a title of a work.

899 0 Bible. ‡l English. ‡s Anchor Bible. ‡f 1964.

‡g Miscellaneous information
Data not identified in other subfields.

‡h Medium
A media qualifier used with a title of a work in a name/title field.

‡k Form subheading
Standardized phrases added to a heading to gather records for certain kinds of materials. Form subheadings include: Manuscript; Protocols, etc.; Selections.

899 0 Koran. ‡l English. ‡k Selections.

‡l Language of a work
The name of the language or the term representing the language (e.g., Polyglot) of a work.

‡m Medium of performance for music
Terms designating the medium of performance.

899 0 Concertos, ‡m violin, string orchestra.

[Uniform title heading is used for a work of unknown authorship.]

‡n Number of part/section of a work
The number designation for a part/section of a work. Numbering is defined as an indication of sequencing in any form (e.g., Book two, Part 1 or Supplement A). Separate multiple numberings with a comma.

899 0 Denkmäler deutscher Tonkunst. ‡n 1. Folge (1957) ; ‡v Bd. 1.
