7xx Introduction

7xx fields

Use fields 700–730 to provide additional access to a bibliographic record from names and/or titles having various relationships to the item you are cataloging. Added entries are made for persons, corporate bodies and meetings having some form of responsibility for the creation of the work. This includes intellectual and publishing responsibilities.

Use fields 700–730 also for added entries for other titles under authority control related to the work for which the record is made (e.g., other editions). Added entries are assigned to records for persons, corporate bodies, meetings and titles which are not given access through subject or series entries.

Use field 740 (Added Entry–Uncontrolled Related/Analytical Title) for a title not under authority control for a part of the item being cataloged or a related item.

Use fields 752–754 to provide access to an item through other aspects of its content or description.

Use fields 76x–78x for linking entries for related items. These fields identify the relationship between bibliographic items.

Use fields 790–793 for added entries not supported by the other cataloging rules.

Current cataloging

If you are inputting current cataloging, construct entries according to Anglo-American Cataloguing Rules, second edition (AACR2) and Library of Congress (LC) practice. Search the OCLC Authority File to verify forms of entry.

Use current LC-AACR2 or AACR2-compatible forms of names and uniform titles. If the current LC-AACR2 or AACR2-compatible form is unknown, construct the heading according to AACR2 1998 rev. and the Library of Congress Rule Interpretations (LCRIs).

Retrospective cataloging

If you are inputting retrospective cataloging, search the OCLC Authority File to verify forms of entry.

Use current LC-AACR2 or AACR2-compatible forms of names and uniform titles. If the current LC-AACR2 or AACR2-compatible form is unknown, you may enter the pre-AACR2 form, but you are encouraged to construct the heading according to AACR2 and the LCRIs.

See section 2.2, “Transcribing Pre-AACR2 Copy,” for more information.

Definition
A personal name used as an added entry. Added entries are assigned according to various cataloging rules to give access to the bibliographic record from personal name headings which may not be more appropriately assigned as field 600 (Subject Added Entry–Personal Name) or field 800 (Series Added Entry–Personal Name). Use for the following types of personal names:

- Names of persons capable of authorship
- Phrases having the structure of forenames or surnames. Use this type of entry if a phrase characterizes an author and is the only clue to the author’s identity
- Names of families
### 700 Added Entry–Personal Name (R) (cont.)

245 14 The Boston driver’s handbook : ‡b the big dig edition / ‡c Ira Gershkoff and Richard Trachtman.
700 1 Gershkoff, Ira. ‡t Wild in the streets.

2 Analytical entry. The item contains the work that is represented by the added entry.

100 1 Bouma, Jelle.
245 10 Marcus Iunius Nypsus : ‡b Fluminis varatio, Limitis repositio : introduction, text, translation, and commentary / ‡c Jelle Bouma.
700 12 Nypsus, Marcus Iunius. ‡t Fluminis varatio. ‡f 1993.
700 12 Nypsus, Marcus Iunius. ‡t Limitis repositio. ‡f 1993.

Subfields

‡a Personal name

A surname and/or forename; abbreviations, initials, letters, numbers or phrases used in place of a name; or a family name. Use subfield ‡c for parenthetical qualifying terms associated with the name. Use subfield ‡q for fuller forms of a name added as a qualifier. Enter a period after initials. Enter one space between initials.

700 12 Ravel, Maurice, ‡d 1875-1937. ‡t Histoires naturelles. ‡p Grillon.

‡b Numeration

A Roman numeral alone or a Roman numeral and a subsequent part of a forename. Use only in a forename heading (i.e., entries with 1st indicator value 0).

700 0 Alexander ‡b VIII, ‡c Pope, ‡d 1610-1691.
700 0 Gustaf ‡b II Adolf, ‡c King of Sweden, ‡d 1594-1632.

‡c Titles and other words associated with a name

Titles and other words associated with a name. These include qualifying information such as:

- A Roman numeral used with a surname
  700 1 Evans, Montgomery, ‡c II.
- Initials of an academic degree or denoting membership in an organization, e.g., F.L.A.
  700 1 Smith, John T., ‡c B.A., M. Phil.
- Terms of address, e.g., Mrs.
  700 1 Beach, H. H. A., ‡c Mrs., ‡d 1867-1944.
- Titles designating rank, office or nobility, e.g., Sir
  700 0 Elizabeta, ‡c Empress, consort of Alexander I, Emperor of Russia, ‡d 1826.
- Other words or phrases associated with a name, e.g., clockmaker or Saint
  700 0 Vivekananda, ‡c Swami, ‡d 1863-1902.
  700 0 Walther, ‡c von der Vogelweide, ‡d 12th cent.

If the heading is a surname followed directly by a prefix without intervening forenames or forename initials, the prefix is contained in subfield ‡c to prevent its being processed as a forename in searching.

700 1 Walle-Lissnijder, ‡c van de.
If a heading consists of a surname with a title or associated words, enter the title following the surname and preceding any other element of the heading. Use subfield ‡q for fuller forms of names in parentheses.

700 1 Gatti de Gamond, ‡c Madame ‡q (Zoé Charlotte)

Multiple adjacent titles or words associated with a name are contained in a single subfield ‡c. Repeat subfield ‡c only when words associated with a name are separated by subelements contained in other subfields.

700 0 Charles Edward, ‡c Prince, grandson of James II, King of England, ‡d 1720-1788.

Use for other parenthetical additions to a name.

700 0 Spagna ‡c (Artist) ‡d ca. 1450-1528.

‡d Dates associated with a name
Birth, death or flourished dates used with a name. A qualifier used with the date (e.g., b., d., ca., fl., cent. or ?) is also contained in subfield ‡d.

700 12 Hazlitt, William, ‡d 1778-1830. ‡t On the fear of death. ‡l French & English.

700 0 Walther, ‡c von der Vogelweide, ‡d 12th cent.

The print program provides any necessary additional spaces after the hyphen.

700 1 Smith, John, ‡d 1924- ‡e defendant.

*Prints as:*

Smith, John 1924- defendant.

‡e Relator term
A designation of function that describes the relationship between a name and a work (e.g. collector, comp., defendant, ed., ill., joint author or tr.). Put multiple relator terms in separate subfields.

700 1 Hecht, Ben, ‡d 1893-1964, ‡e direction, ‡e production.

Relator codes, which also specify a relationship of the person to the work, are contained in subfield ‡4.

‡f Date of work
The date of publication used with a title of a work in a name/title heading. A date added parenthetically to a title to distinguish between identical titles entered under the same name is not entered in a separate subfield, except for scores or sound recordings. For music, see subfield ‡n.

700 12 Freud, Sigmund, ‡d 1856-1939. ‡t Selections. ‡f 1978

‡g Miscellaneous information
Data not identified in another subfield. Unlikely to be used in field 700.

‡h Medium
Do not use.

‡j Attribution qualifier
Attribution information when the responsibility is unknown, uncertain, fictitious or pseudonymous. Use for qualifiers that follow the name of a known artist for the work. Do not use subfield ‡j for headings formulated according to AACR2.

700 0 E.S., ‡c Meister, ‡d 15 cent., ‡j Follower of

‡k Form subheading
A form subheading. Use in the name or title portion. For example, *Selections.*

</tbody>
</table>

**tl** Language of a work
The name of the language or the term representing the language (e.g., Polyglot) of a work.

**tm** Medium of performance for music
Terms designating the medium of performance used in a uniform title for a work in a name/title field. Enter multiple adjacent elements in a single medium statement in the same subfield ‡m. Repeat subfield ‡m only when medium of performance statements are separated by subelements contained in other subfields.

**tn** Number of part/section of a work
The number designation for a part/section of a work used with a title in a name/title field. Numbering is an indication of sequencing in any form (e.g., Book two, Part 1 or Supplement A). For music, use the opus, serial or thematic index number or a date used as a number in subfield ‡n. Enter multiple numberings for a part/section separated by a comma (usually alternative numberings) in a single subfield ‡n. Enter multiple numberings for a part/section separated by a period (usually numberings of subparts) in separate subfield ‡n’s.

**to** Arranged statement for music
The abbreviation *arr:* used for a uniform title in a name/title field.

**tp** Name of part/section of a work
A name designation of a part/section of a work in a name/title field.

**tq** Fuller form of name
A more complete form or part of the name than is in subfield ‡a. Enter unused forenames or surnames if the name is necessary to resolve conflicts.

**tr** Key for music
A statement of key in which the music is written used in a uniform title for a work in a name/title field.

**ts** Version
The version, edition, etc., information used with a title of a work in a name/title field.

**tt** Title of a work
A uniform title, a title page title of a work or a series title used in a name/title field.

**tu** Affiliation
The affiliation or address of the name in subfield ‡a.

7xx 7:7
700 Added Entry–Personal Name (R) (cont.)

‡x International Standard Serial Number
The International Standard Serial Number (ISSN) for a serial title given in the title portion of a name/title field. The ISSN is an agency-assigned data element.

‡0 Authority record control number
System control number of the related authority record preceded by the MARC code, enclosed in parentheses, for the agency to which the control number applies. For a listing of sources used in MARC 21 records, see the MARC Code List for Organizations (http://www.loc.gov/marc/organizations/orgshome.html).

‡3 Materials specified
The part of the described materials to which the field applies.

‡4 Relator code
A three-character code that indicates the relationship of a name to a work. See MARC Code Lists for Relators, Sources, Descriptive Conventions (http://www.loc.gov/marc/relators/relahome.html). Put multiple relator codes in separate subfields.

700 1 Galway, James. ‡4 prf ‡4 cnd
Relator terms, which also specify a relationship of a person to a work, are contained in subfield ‡e.

‡5 Institution to which field applies
A code of the institution or organization that holds the copy to which the field applies. Use for notes that do not apply to the universal description of the item. See MARC Code List for Organizations (http://www.loc.gov/marc/organizations/orgshome.html) or Symbols and Interlibrary Loan Policies in Canada (http://www.nlc-bnc.ca/6/16/s16-202-e.html).

700 1 Kissinger, Henry, ‡d 1923- ‡5 DLC

Printing
Field 700 prints as a heading and tracing. Subfields ‡u, ‡x, ‡3, ‡4 and ‡5 do not print. In the tracing paragraph, the print program supplies consecutive Roman numerals for added entry tracings.

Definition
A corporate name used as an added entry heading. An added entry heading is assigned according to various cataloging rules to give access to the bibliographic record from corporate name headings which may not be more appropriate assigned as field 610 (Subject Added Entry–Corporate Name) or field 810 (Series Added Entry–Corporate Name). Corporate names are the names of agencies, associations, businesses, firms, governments, institutions, nonprofit enterprises, performing groups, etc. Use for the following types of corporate names:

- Organized bodies entered directly under their own names
- Organized bodies entered under names of political jurisdictions
- Political jurisdictions standing alone
Special corporate names, such as names of abbeys, cathedrals, churches, denominations, monasteries, missions, musical groups, parishes, priories, programs, studies and vessels (e.g., Catholic Church, Dire Straits (Musical group), Monasterio Las Descalzas (Lima, Peru), New York Philharmonic or Writers’ Program)

Names of conferences, conventions, exhibitions, expeditions, festivals and meetings entered indirectly, that is, under the name of a corporate body (e.g., Labour Party (Great Britain). Conference)

**1st Indicator**

**Type of corporate name entry element.** The form of name. These values could be used to facilitate card filing arrangements. However, OCLC does not differentiate among forms of name for sorting cards.

0 **Inverted name.** Pre-AACR2 headings in inverted order.

710 0 Penny (J.C.) Co.

[Pre-AACR2.]

1 **Jurisdiction name.** Jurisdictions may be ecclesiastical entities or the jurisdiction name under which you enter a corporate name, a city section or a title of a work (e.g., France or New York (N.Y)). Corporate names containing a name of a jurisdiction as an integral part of the name or qualified by a jurisdiction name are identified by 1st indicator value 2.

710 1 Pennsylvania. ‡b State Board of Examiners of Nursing Home Administrators.

2 **Name in direct order.** Corporate names entered in direct order. These headings may also have a parenthetical qualifier or may be an acronym or initialism.

710 2 WGBH (Television station : Boston, Mass.)

**2nd Indicator**

**Type of added entry.** The type of added entry. The values distinguish between no information provided and an analytical entry. These indicators could be used to facilitate card filing arrangements. However, OCLC does not differentiate among types of added entries for sorting cards.

‡ **No information provided.** Either the added entry is not for an analytic or no information is provided as to whether the added entry is for an analytic.

100 1 Gotshaw, F. Marco.

245 10 Journeyman’s guide to the National Electrical Code / ‡c Furman Marco Gotshaw.

2 **Analytical entry.** The item contains the work that is represented by the added entry.

100 1 Fernandez, Perfecto V.

245 10 Primer on labor law, 1982-92 / ‡b Perfecto V. Fernandez.

500 Includes text of the Philippines labor relations law.

710 12 Philippines. ‡t Labor code of the Philippines. ‡n Book 5, ‡p Labor relations. ‡f 1981.

710 Added Entry–Corporate Name (R)  (cont.)

‡u Affiliation
The affiliation or address of the name in subfield ‡a.

710 2  Industrial Environmental Research Laboratory. ‡u Research Triangle Park, N.C.

‡x International Standard Serial Number
The International Standard Serial Number (ISSN) for a serial title given in the title portion of a name/title field. The ISSN is an agency-assigned data element. The print program provides ISSN before the number in printed series statements. The ISSN does not print in the series tracing or added entry.

‡0 Authority record control number
System control number of the related authority record preceded by the MARC code, enclosed in parentheses, for the agency to which the control number applies. For a listing of sources used in MARC 21 records, see the MARC Code List for Organizations (http://www.loc.gov/marc/organizations/orgshome.html).

‡3 Materials specified
The part of the described materials to which the field applies.

‡4 Relator code
A three-character code that indicates the relationship of a name to a work. More than one relator code may be used if the corporate name has more than one function. Put multiple relator codes in separate subfields. The code is given after the name portion in name/title fields. See MARC Code Lists for Relators, Sources, Descriptive Conventions (http://www.loc.gov/marc/relators/relahome.html).

710 2  J.H. Bufford & Co. ‡4 pop

Relator terms, which also specify a relationship of a corporate body to a work, are contained in subfield ‡e.

‡5 Institution to which field applies
A code of the institution or organization that holds the copy to which the field applies. Use for notes that do not apply to the universal description of the item. See MARC Code List for Organizations (http://www.loc.gov/marc/organizations/orgshome.html) or Symbols and Interlibrary Loan Policies in Canada (http://www.nlc-bnc.ca/6/16/s16-202-e.html).

710 2  Bridgewater Library, ‡e former owner. ‡5 NjP

Printing
Field 710 prints as a heading and tracing. Subfields ‡u, ‡x, ‡3, ‡4 and ‡5 do not print. In the tracing paragraph, the print program supplies consecutive Roman numerals for added entry tracings.

### Definition

A conference or meeting name used as an added entry. An added entry is assigned according to various cataloging rules to give access to the bibliographic record from conference or meeting name headings which may not be more appropriately assigned as field 611 (Subject Added Entry–Meeting Name) or field 811 (Series Added Entry–Meeting Name). Conference or meeting names are the names of athletic contests, conferences, exhibitions, expositions, festivals, meetings and scientific expeditions.

If you enter a conference or meeting name indirectly (i.e., under the name of a corporate body), use field 710 (Added Entry–Corporate Name). If in doubt, use field 711.

### 1st Indicator

**Type of meeting name entry element.** The form of name. These values could be used to facilitate card filing arrangements. However, OCLC does not differentiate among forms of name for sorting cards.
711 Added Entry—Meeting Name (R) (cont.)

0 Inverted name. Pre-AACR2 headings in inverted order.
711 0 Smith (David Nichol) Memorial Seminar.

1 Jurisdiction name. Pre-AACR2 headings for a conference name entered under ecclesiastical entities or the jurisdiction names under which you enter a corporate name, a city section or a title of a work.
711 1 Chicago. ‡q Cartography Conference.

2 Name in direct order. Conference names entered in direct order. These headings may also have a parenthetical qualifier or may be an acronym or initialism.
711 2 Van Cliburn International Piano Competition.

2nd Indicator

Type of added entry. The type of added entry. The values distinguish between no information provided and an analytical entry. These indicators could be used to facilitate card filing arrangements. However, OCLC does not differentiate among types of added entries for sorting cards.

b No information provided. Either the added entry is not for an analytic or no information is provided as to whether the added entry is for an analytic.
245 00 Neoplatonism and gnosticism / ‡c Richard T. Wallis, editor, Jay Bregman, associate editor.
711 2 International Conference on Neoplatonism and Gnosticism ‡d (1984 : ‡c University of Oklahoma)

2 Analytical entry. The item contains the work that is represented by the added entry.
245 00 International bilateral dialogues : ‡b 1965-1991 : list of commissions, meetings, themes, and reports / ‡c compiled by G¨unther Gassman. Report / Fifth Forum on Bilateral Conversations.

Subfields

‡a Meeting name or jurisdiction name as entry element

Name of a meeting or a jurisdiction name under which a meeting is entered. Enter parenthetical qualifying information in subfield ‡a.
711 2 Theatertreffen Berlin (Festival)

‡c Location of meeting

Place name or a name of an institution where a meeting was held. Use a single subfield ‡c for multiple adjacent locations.
711 2 Conference on Philosophy and Its History ‡d (1983 : ‡c University of Lancaster)
711 2 Symposium on Antinucleon-Nucleon Interactions ‡d (1974 : ‡c Liblice, Czechoslovakia, and Prague, Czechoslovakia)

‡d Date of meeting

The date a meeting was held.

</table>

**Definition**

A name associated with a work when the name is not controlled in an authority file or list. Use also for names that have not been formulated according to cataloging rules. The names may be of any type (e.g., personal, corporate, meeting). Record the parts of names consisting of several parts in whatever order is desired. Repeat field 720 for multiple names.

Use field 720 when one of the other access fields (e.g., the 1xx or 7xx fields) cannot be used because the level of control and/or structure of the name does not meet the requirements of the other access fields. Do not use field 720 for uncontrolled names intended to provide subject access. Use field 653 instead.

**1st Indicator**  Type of name. A value that indicates whether the name is personal, not personal or the type is not known.

- Undefined. The type of name is not known or not specified.
- 1 Personal. The name is known to be personal.
- 2 Other. The name is known to be other than personal.

**2nd Indicator**  Undefined. The 2nd indicator position is undefined and contains a blank (b).

## Definition

A uniform title used as an added entry. An added entry is assigned according to various cataloging rules to give access to the bibliographic record from headings which may not be more appropriately assigned as field 630 (Subject Added Entry–Uniform Title) or field 830 (Series Added Entry–Uniform Title) fields. Use for the following types of uniform titles:

- Anonymous works
- Composite manuscripts or manuscript groups
- Concordats
- Names of journals and newspapers
- Radio and television programs
- Motion pictures and videorecordings
- Treaties and inter-governmental agreements

## Serials

Use field 730 for a title added entry that cannot be generated by any other field. In addition to using field 730 for uniform titles used to collocate records, field 730 may be used in AACR2 cataloging for serials uniform titles. Use field 730 to differentiate items published under an identical title proper in some cases, as outlined in the CONSER Standard Record Guidelines (http://www.loc.gov/catdir/...
730 Added Entry–Uniform Title (R) (cont.)

cpso/conserdoc.pdf). The uniform title consists of the title proper followed by a qualifier enclosed in parentheses. The qualifier is usually the place of publication, distribution or name of the issuing body.

If the place qualifier changes (e.g., either the name of the place changes or the place of publication changes), do not change the uniform title. Continue to use the existing record. Enter the appropriate information in a note.

If the issuing-body qualifier changes (e.g., either the name of the body changes or that body ceases to be associated with the work), create a new record with a new uniform title. See the Library of Congress Rule Interpretation 25.5B (http://www.loc.gov/catdir/cpso/currlcri.html) for guidelines about choice of qualifier.

1st Indicator

Nonfiling characters. The number of character positions associated with a definite or indefinite article (e.g., An or The) at the beginning of a title and that are disregarded in sorting and filing processes.

Current practice is to enter the title without articles and use 1st indicator value 0.

0 No nonfiling characters. No initial article character positions are disregarded. Use value 0 if the title does not begin with an article.

730 0 Collection africaine.

Diacritical marks or special characters at the beginning of a series statement field that does not begin with an initial article are counted as nonfiling characters.

730 0 Ökonomische Studien.

1-9 Number of nonfiling characters present. A field begins with a definite or indefinite article that is disregarded in sorting and filing processes. Enter the number of characters in the article, plus spaces, punctuation, diacritical marks and special characters that precede the first significant word.

Any diacritical mark or special character associated with the first filing character is not included in the count of nonfiling characters.

2nd Indicator

Type of added entry. The values distinguish between no information provided and an analytical entry. These indicators could be used to facilitate card filing arrangements. However, OCLC does not differentiate among types of added entries for sorting cards.

b No information provided. Either the added entry is not for an analytic or no information is provided as to whether the added entry is for an analytic.

245 00 Chemical pricing patterns: b comparisons of annual high and low prices for 1,250 key chemicals and related process materials for the years of 1952...

500 At head of title: Oil, paint and drug reporter.

730 0 Oil, paint and drug reporter.

2 Analytical entry. The item contains the work that is represented by the added entry.

100 1 Barwise, Jon.

245 14 The language of first-order logic: b including the Macintosh program Tarski’s world 4.0 / c Jon Barwise and John Etchemendy.
730 Added Entry–Uniform Title (R) (cont.)

Subfields

‡a Uniform title
The uniform title. Enter parenthetical information added to make a title distinctive in subfield ‡a. Use subfield ‡d to record the date of signing added to a uniform title for a treaty.

Do not use.

‡k Form subheading
Standardized phrases added to a heading to gather records for certain kinds of materials. Form subheadings include: Manuscript; Protocols, etc.; Selections.

- 730 02 Talmud. ‡l English. ‡k Selections.

‡l Language of a work
The name of the language or the term representing the language (e.g., Polyglot) of a work.

‡m Medium of performance for music
Terms designating the medium of performance.

- 730 0 Concertos, ‡m violin, string orchestra, ‡r D major.

[Uniform title heading is used for a work of unknown authorship.]

‡n Number of part/section of a work
The number designation for a part/section of a work. Numbering is defined as an indication of sequencing in any form (e.g., Book two, Part 1 or Supplement A). Separate multiple numberings with a comma.

- 730 0 Economics library selections. ‡n Series 1, ‡p New books in economics.

‡o Arranged statement for music
The abbreviation arr: used in a uniform title field.

- 730 02 God save the king; ‡o arr. ‡f 1982.

‡p Name of part/section of a work
A name designation of a part/section of a work.

[Part/section is both numbered and named.]

‡r Key for music
The statement of key in which the music is written.

- 730 0 Concertos, ‡m violin, string orchestra, ‡r D major.

‡s Version
The versions, edition, etc., information.

- 730 0 Bible. ‡p N.T. ‡p Luke. ‡l Greek. ‡s Codex Sinaiticus.
730 Added Entry–Uniform Title (R)  (cont.)

</tr>
</tbody>
</table>

### Definition

An added entry for uncontrolled related titles and uncontrolled analytical titles. An uncontrolled title is a title **not** controlled through an authority file or another bibliographic record. Use field 740 for the title portion of a related work that would normally be entered under a name/title heading in catalog entry form. In records for collections lacking a collective title, use field 740 also for titles recorded in field 245 subsequent to the first title.

Use 730 Added Entry–Uniform Title (R) for uniform title added entries for related works and for analytical titles. Use field 246 for variant forms of the title recorded in field 245 and variants of the first title in field 245 for collections lacking a collective title.

### 1st Indicator

**Nonfiling characters.** The number of character positions associated with a definite or indefinite article (e.g., *An* or *The*) at the beginning of a title and that are disregarded in sorting and filing processes.

Current practice is to enter the title without articles and use 1st indicator value **0**.

**0 No nonfiling characters.** No initial article character positions are disregarded.

Use value **0** if the title does **not** begin with an article.

740 0  Collection africaine.

Diacritical marks or special characters at the beginning of a series statement field that does **not** begin with an initial article are **not** counted as nonfiling characters.

740 0  Ökonomische Studien.

**1-9 Number of nonfiling characters present.** A field begins with a definite or indefinite article that is disregarded in sorting and filing processes. Enter the number of characters in the article, plus spaces, punctuation, diacritical marks and special characters that precede the first significant word.

Any diacritical mark or special character associated with the first filing character is **not** included in the count of nonfiling characters.
**2nd Indicator**

**Type of added entry.** The values distinguish between no information provided and an analytical entry. These indicators could be used to facilitate card filing arrangements. However, OCLC does not differentiate among types of added entries for sorting cards.

- **b** No information provided. Either the added entry is not for an analytic or no information is provided as to whether the added entry is for an analytic.
  
  740 0  Healing our culture, healing ourselves.

- **0** Alternative entry. Obsolete. Do not use.

- **1** Secondary entry/Added entry printed on LC cards. Obsolete. Do not use.

- **2** Analytical entry. The item contains the work that is represented by the added entry.
  
  100 1  Chekhov, Anton Pavlovich, ‡d 1860-1904
  245 14  The cherry orchard ; ‡b Uncle Vanya /‡c Anton Chekhov.
  740 02  Uncle Vanya.

- **3** Added entry not printed on LC cards. Obsolete. Do not use.

**Subfields**

- **‡a Uncontrolled related/analytical title**
  The uncontrolled related/analytical title. Enter parenthetical explanatory data which may appear as part of the title in subfield ‡a.
  
  245 10  Techniques and concepts of high-energy physics / ‡c edited by Thomas Ferbel.
  505 00  ‡t Quark models / ‡r J. Rosner -- ‡t Introduction to gauge theories of the strong, weak, and electromagnetic interactions / ‡r C. Quigg -- ‡t Deep inelastic leptonnucleon scattering / ‡r D.H. Perkins -- ‡t Jet phenomena / ‡t M. Jacob -- ‡t An accelerator design study / ‡t R.R. Wilson -- ‡t Lectures in accelerator theory / ‡t M. Month.
  740 02  Deep inelastic leptonnucleon scattering.
  740 02  Jet phenomena.
  740 02  Accelerator design study.
  740 02  Lectures in accelerator theory.

- **‡h Medium**

  Do not use.

- **‡n Number of part/section of a work**
  The number designation for a part/section of a work. Numbering is defined as an indication of sequencing in any form (e.g., Book two, Part 1 or Supplement A). Separate multiple numberings with a comma.
  
  740 02  Economics library selections. ‡n Series 1, ‡p New books in economics.

- **‡p Name of part/section of a work**
  A name designation of a part/section of a work.
  
  740 02  Dissolution of the family unit. ‡p Divorce, separation, and annulment.

- **‡5 Institution to which field applies**
  A code of the institution or organization that holds the copy to which the field applies. Use for notes that do not apply to the universal description of the item. See MARC Code List for Organizations (http://www.loc.gov/marc/organizations/orgshome.html) or Symbols and Interlibrary Loan Policies in Canada (http://www.nlc-bnc.ca/6/16/s16-202-e.html).
  
  740 02  Index librorum prohibitorum. ‡5 [MARC organization code]
Field 740 prints as a heading and tracing. Subfield ‡5 does not print. In the tracing paragraph, the title traced differently prints as the last 7xx tracing. The print program supplies consecutive Roman numerals and the word Title: before the title tracing. Do not enter Title: in field 740.
### 751 Added Entry–Geographic Name (R)

**Input Standards**

### Printing

Field 752 prints as a heading and a tracing. It prints in uppercase and lowercase as entered or as determined by your profile for 7xx fields. The print program supplies a dash (--) between data in each subfield and a period at the end of the added entry or tracing, unless final punctuation (., ! ?) is present. The heading sorts into the same receiving catalog as field 710 (Added Entry–Corporate Name). Multiple tracings print in order of appearance in the record. In the tracing position, the print program supplies Place: after the appropriate Roman numeral.

752 United States ‡b Ohio ‡d Dublin.

*Prints as a heading:*

United States--Ohio--Dublin.

*Prints as a tracing (with appropriate Roman numeral):*

IV. Place: United States--Ohio--Dublin.
753 System Details Access to Computer Files (R)

**‡2 Source of taxonomic identification** (NR) Mandatory/Mandatory

### Definition
Taxonomic identification information associated with the item.

1st Indicator: Undefined. The 1st indicator position is undefined and contains a blank (§).

2nd Indicator: Undefined. The 2nd indicator position is undefined and contains a blank (§).

Subfields

- **‡a Taxonomic name**: The taxonomic name conforms to the syntax controls of the taxonomic classification system identified in subfield ‡2. Repeat subfield ‡a for each taxonomic name associated with the item. Precede subfield ‡a by subfield ‡c, which indicates the taxonomic hierarchical category to which the name belongs. Each combination is input in repeatable ‡c and ‡a subfields in taxonomic hierarchical order.

- **‡c Taxonomic category**: The taxonomic category to which the name in subfield ‡a belongs. The terms used in this subfield are specified by the thesaurus identified in subfield ‡2. Subfield ‡c always precedes the data with which it is associated.

- **‡d Common or alternative name**: The common or alternative name to which the name in subfield ‡a belongs. Subfield ‡d may refer to one or multiple occurrences of subfield ‡a.

- **‡x Nonpublic note**: A note pertaining to the taxonomic identification of the item that is in a form not adequate for public display.

- **‡z Public note**: A note pertaining to the taxonomic identification of the item that is in a form adequate for public display.

- **‡0 Authority record control number**: System control number of the related authority record preceded by the MARC code, enclosed in parentheses, for the agency to which the control number applies. For a listing of sources used in MARC 21 records, see the [MARC Code List for Organizations](http://www.loc.gov/marc/organizations/orgshome.html).

- **‡2 Source of taxonomic identification**: The name or MARC code that identifies the source list from which the taxonomic identification was assigned. For the MARC code, see [MARC Code Lists for Relators, Sources, Descriptive Conventions](http://www.loc.gov/marc/relators/relahome.html).

- 774 Constituent Unit Entry (R)
- 775 Other Edition Entry (R)
- 776 Additional Physical Form Entry (R)
- 777 Issued With Entry (R)
- 780 Preceding Entry (R)
- 785 Succeeding Entry (R)
- 786 Data Source Entry (R)
- 787 Nonspecific Relationship Entry (R)

Definition

A linking entry describes separately cataloged publications that are related to the item you are cataloging. These fields allow the establishment of bibliographic connections among materials with diverse relationships.

Linking entry fields do not take the place of added entry fields and do not generate tracings. Use the 4xx or 8xx series fields or field 730, for example, for added entries. Most linking entries are made for serials.

Each of the linking entry fields specifies a different bibliographic relationship between the target item described by the record and a related item. These relationships fall into the following groups:

- Related items that assist the user in continuing to search, but are not physically required to obtain the target item (e.g., former entries for serials or translations of the target item)
- Related items that have to be obtained physically in order to use the target item (e.g., the host item for a component part such as a journal issue containing a specific article)
- Related items that are constituent units of a larger whole (e.g., the individual photographs contained in a visual material collection)

The linking entry fields generate a note in the record in which they appear. Use the linking entry fields also to provide machine linkage between the bibliographic record for the target item and the bibliographic record for a related item, if the related item is covered by a separate record.

Terms used in linking entry fields

**Target item.** A bibliographic item that is the principal or primary unit for the description of which the record was constructed. The target item is the item to which the data in *Type* and *BLvl* apply. The title of the target item is in the *field 245.*
Related item. A bibliographic item that has either a chronological, horizontal, or vertical relationship with a target item, and for which the linking entry field is created.

Host item. A bibliographic item that either physically contains (as in the case of the component part), or bibliographically includes, (as in the case of a constituent unit), the subpart that is the target item for the record. For example: if a record describes a journal article, the host is the journal; if a record describes one digital item in a set, the host is the set.

Component part. A bibliographic item that is physically part of another bibliographic item such that the retrieval of the part is dependent on the physical identification and location of the host item (e.g., a chapter in a book or an article in a journal).

Constituent unit. A bibliographic item that is part of another item. The constituent unit is physically separate from the item of which it is considered a part.

Chronological relationship. The relationship in time between bibliographic items (e.g., the relation of a serial to its predecessors and successors).

Horizontal relationship. The relationship between versions of a bibliographic item in different languages, format, media, etc.

Vertical relationship. The hierarchical relationship of the whole to its parts and the parts to the whole (e.g., a journal article to the journal or a subseries to a main entry series).

Construction of linking entries

If a separate record for the related publication exists, use that record as the source of data for the linking entry.

The first choice for identification is the uniform title. If available, use the entire uniform title (e.g., title and qualifier) to identify the related publication. If the uniform title is unavailable, use the main entry and title proper. For example, if OCLC record number 6597310 has the following uniform title:

130 0 Monthly digest of statistics (Zimbabwe. Central Statistical Office)

It would be linked to the related publication in field 780.

780 00 ‡t Monthly digest of statistics (Zimbabwe. Central Statistical Office) ‡w (OCoLC)6597310

Some records may not have uniform titles or main entries/titles because the Library of Congress used the key title and International Standard Serial Number for linking fields prior to AACR2.

Pre-AACR2 serials

You must differentiate pre-AACR2 serials that have the same title proper, but no distinguishing uniform title. Use the following types of information (listed in order of preference) to differentiate among pre-AACR2 serials:

- Name of edition (subfield ‡b)
- Language (subfield ‡e)
- Country (subfield ‡f )
- Other qualifying information (subfield ‡c)
Use the following subfields in the linking entry fields. See the description of each field for the valid subfields. You are unlikely to use subfields ‡b, ‡c, ‡d, ‡e, ‡f, ‡h, ‡m, ‡n, ‡k, ‡p, ‡r, ‡u, ‡y and ‡z in serial linking entry fields constructed according to AACR2. Include final punctuation in subfields ‡a and ‡c.

**‡a Main entry heading**  
The main entry heading data (without subfield codes) from field 100, field 110 or field 111 in the related record. Individual components of the name are not recorded in a separate subfield ‡a as they would be in a 1xx field. Use subfield ‡t for the uniform title data from field 130 in the related record.

773 0 ‡7 c2bc ‡a Massachusetts. Commission on Consumer Affairs. ‡t Records

780 00 ‡a American Hospital Association. ‡t Bulletin of the American Hospital Association ‡w (OCoLC)1777831

785 01 ‡a Southeastern College Art Conference. ‡t SECAC newsletter ‡w (OCoLC)4973820

**‡b Edition**  
The name of the edition from field 250 of the related record. Subfield ‡b is not used when linking to AACR2 serial records.

100 1 Mellor, Alec.
245 10 Strange masonic stories
775 0 ‡t Wall Street journal ‡b Southwest ed.

**‡c Qualifying information**  
Data needed to distinguish between two titles. Generally, the cataloger supplies this parenthetical information. Subfield ‡c is generally not used in AACR2 records.

775 0 ‡t IFDC report ‡c (Spanish edition) ‡x 0149-5852

[Pre-AACR2.]

776 1 ‡c Original ‡w (DLC) 24020326

[Pre-AACR2. The item in hand is a reproduction. Field 776 gives information as to the original record.]

785 00 ‡t American spectator ‡c (Bloomington, 1977)

[Pre-AACR2.]

**‡d Place, publisher and date of publication**  
Publication information from subfields ‡a, ‡b and ‡c of field 260 of the related record. Subfield ‡d is generally not used when linking to serial records.

773 0 ‡7 p1am ‡a Hamilton, Milton W. (Milton Wheaton), 1901- ‡t Sir William Johnson and the Indians of New York. ‡d [Albany] : University of the State of New York, State Education Dept., Office of State History, 1967 ‡w (DLC) 68066801

[Host item is identified by author, title and record number.]

**‡e Language code**  
The language code from Lang of the related record. Subfield ‡e is generally not used.

130 0 Cuba economic news. ‡l Spanish
245 10 Cuba noticias económicas.
580 Issued also in English: Cuba economic news.
775 1 ‡t Cuba economic news ‡x 0590-2932 ‡e eng ‡w (OCoLC)2259984

**‡f Country code**  
The language code from Ctry of the related record. Subfield ‡f is generally not used.
‡g Relationship information
Data that indicates the specific piece or pieces of the related item (e.g., dates or volumes).

772 1 ‡t Aval ‡g [1982-]
773 0 ‡t Horizon ‡g Vol. 17, no. 98 (Feb. 1948), p. 78-159
[Host item is identified by title.]
245 00 Communist.

775 1 ‡t Petroleum engineer. ‡b Petro/chem engineer edition
[Pre-AACR2.]
775 1 ‡t Petroleum engineer. ‡b Pipeline engineer edition
[Pre-AACR2.]

‡j Period of content
The beginning, and if appropriate, the ending date(s) of the content of the related item. Use the following eight-character format: yyyyymmdd.
Enter time in the following eight-character format: hhmmss.f (hour, minute, second and decimal fraction of the second, including the decimal point). Use the 24-hour clock (00–23). Use subfield ‡j for the basis on which the source time period of content information was determined.

‡k Series data for related item
The series entry from the 4xx or the 8xx field of the related record. Subfield ‡k is generally not used.

‡u Standard Technical Report Number
The STRN from field 027 of the related record.

‡v Source contribution
A brief statement identifying the information contributed by a source to a data set.

786 0 ‡a United States. Defense Mapping Agency. ‡t Reno, NV-CA west digital terrain elevation data ‡v Data for reformatting to DEM format

‡w Record control number
The system control number of the related record preceded by the MARC code, enclosed in parentheses, for the agency to which the control number applies. See MARC Code List for Organizations (http://www.loc.gov/marc/organizations/orgshome.html).

Instructions for inputting the LCCN (from field 010 of the related record):
The LCCN in subfield ‡w of a linking entry field corresponds to that in field 010 subfield ‡a of the related record. The form input in subfield ‡w is not the one used in field 010. Instead, it is, approximately, the machine-readable form of the LCCN.
Also, there are differences in how the post-2000 and pre-2001 formats of LCCN are recorded in subfield ‡w.

Post-2000 LCCN format:
1. Always input DLC enclosed within parentheses.
2. Input two leading blank spaces between the symbol (DLC) and the year information, if the LCCN has no prefix. If the LCCN has a two-character prefix, input no blank spaces between the prefix and the year numbers.
3. Input the four-digit year information.
4. Do not input a hyphen.
5. Input the six-digit number. Input leading zeros where necessary.

776 1 ‡t ESAIM. Control, optimisation and calculus of variations ‡x 1292-8119 ‡w (DLC) 2001203401 ‡w (OCoLC)45723846

785 00 ‡t Freedom watch (Toronto, Ont.) ‡w (DLC)cn2001390000 ‡w (OCoLC)45400852

Pre-2001 LCCN format:
1. Always input DLC enclosed within parentheses.
2. Input three leading blank spaces between the symbol (DLC) and the year numbers if the LCCN has no prefix. If the LCCN has a prefix of fewer than three characters, leave the appropriate number of blank spaces following the prefix.
3. Input the two-digit year information.
4. Do not input a hyphen.
5. Input the six-digit number. Input leading zeros where necessary.
6. Do not input trailing blank following the number. (If trailing blank is input, the OCLC system removes it.)
7. Do not input alphabetic identifiers and/or revision dates.

780 00 ‡t Journal of neurosurgery ‡w (DLC)med47001541

§y CODEN designation

The CODEN designation from field 030 of the related record.

§z International Standard Book Number

The International Standard Book Number (ISBN) from field 020 of the related record.

776 1 ‡c Original ‡z 0415059615 ‡w (DLC) 91040570
‡w (OCoLC)24973658

§3 Materials specified

The part of the described materials to which the field applies.

§7 Control subfield

Up to four one-character codes that indicate special characteristics of the linked entry. Because the definition of the codes in subfield §7 are dependent on the character position in which they occur, the coding of any character position mandates that each preceding character position contains a code. Succeeding character positions need not be used. For example, if position 0 and 1 are not applicable, but position 2 is, then position 0 and 1 contain code n.

245 14 The Foundling hospital for wit : ‡b intended for the reception and preservation of such...
772 1 ‡7 plas ‡a Silence, Timothy. ‡t Foundling hospital for wit ‡w (DLC) 85014367

773 0 ‡7 p1am ‡a Desio, Ardito, 1897- ‡t Geographical features of the Karakorum. ‡d Milano : ISMEO, 1991
[Host item is identified by author and title.]
• /0 Type of main entry heading. A one-character code that indicates the type of name in subfield ‡a. Use code \textit{n} if there is no subfield ‡a. Use one of the following:

- \textit{p} Personal name
- \textit{c} Corporate name
- \textit{m} Meeting name
- \textit{u} Uniform title
- \textit{n} Not applicable

• /1 Form of name. A one-character code that indicates the form of the name in subfield ‡a.
  
  — If \textit{0} is \textit{p}, use one of the following:

  - \textit{0} Forename
  - \textit{1} Surname
  - \textit{3} Family name

  — If \textit{0} is \textit{c} or \textit{m}, use one of the following:

  - \textit{0} Inverted name
  - \textit{1} Jurisdiction name
  - \textit{2} Name in direct order

  — If \textit{0} is \textit{u} or \textit{n}, use the following:

  - \textit{n} Not applicable

• /2 Type of record. A one-character code that indicates the type of record for the related item. Use the Type code in the record for the related item

• /3 Bibliographic level. A one-character code that indicates the bibliographic level of the related item. Use the BLvl in the record for the related item.

**Printing**

Except for fields 773, 780, and 785, the 76x–78x fields do not print. Enter indicator values, however, as if they do. If an intelligible note can be provided from the linking entry field, use 1st indicator value \textit{0}. If an intelligible note cannot be provided, use 1st indicator value \textit{1}.

Fields 773, 780 and 785 print as notes. Subfield ‡i prints as input. Subfield ‡o does not print. The program supplies display constants according to the indicator values. Do not enter display constants such as \textit{In.}, \textit{Continues:} or \textit{Absorbed by:} in these fields. See fields 773, 780 and 785 for more information.

If you want to provide notes for nonprinting linking entry fields, use field 500 or field 580. If you use fields 500 or 580 to provide a note, use 1st indicator value \textit{1} in the linking entry field.

**Definition**
Information about a related main series when the target item in the vertical relationship is a subseries. Use field 760 in addition to any other series information. Use separate 760 fields for each main series. See “76x-78x Linking Entry Fields—Introduction” for more information.

1st Indicator  
**Note controller.** A value that specifies whether or not a display note is to be generated from the field. These values could be used to control printing. However, field 760 does not print. Nevertheless, you should enter the values as if it does.

0  Display note. A note is generated from the data in the linking entry field or from the related record. Use to indicate that field 580 (Linking Entry Complexity Note) is not present.

1  Do not display note. A note is not generated from the data in the linking entry field or from the related record. Use 1st indicator value 1 when the display constant associated with the linking field does not adequately describe the relationship. Use field 580 (Linking Entry Complexity Note) for the note.

2nd Indicator  
**Display constant controller.** A value that controls the generation of a display constant preceding the data in the linking entry field.

b  Main series. A value that generates the display constant Main series: or Subseries of:
8 **No display constant generated.** A value that specifies that a display constant is **not** generated. Use subfield ‡i when special introductory text is needed.

**Printing**

Field 760 does **not** print. Do **not** enter *Main series: or Subseries of:* in field 760.

**Definition**  Information about a related subseries when the target item in the vertical relationship is a main series or a parent subseries. Use field 762 in addition to any other series information. Use separate 762 fields for each related subseries. See “76x-78x Linking Entry Fields–Introduction” for more information.

1st Indicator  Note controller. A value that specifies whether or not a display note is to be generated from the field. These values could be used to control printing. However, field 762 does not print. Nevertheless, you should enter the values as if it does.

0  Display note. A note is generated from the linking entry field or related record. Use to indicate that field 580 (Linking Entry Complexity Note) is not present.

1  Do not display note. A note is not generated from the data in the linking entry field or from the related record. Use 1st indicator value 1 when the display constant associated with the linking field does not adequately describe the relationship. Use field 580 (Linking Entry Complexity Note) for the note.
2nd Indicator

- **Display constant controller.** A value that controls the generation of a display constant preceding the data in the linking entry field.

- **Has subseries.** A value that generates the display constant *Has subseries:.*

- **No display constant generated.** A value that specifies that a display constant is not generated. Use subfield ǂi when special introductory text is needed.

Printing

Field 762 does not print. Do not enter *Has subseries:* in field 762.

**Definition**
Information about the publication in its original language when the target item in the horizontal relationship is a translation. See “76x-78x Linking Entry Fields—Introduction” for more information.

**1st Indicator**
- **Note controller.** A value that specifies whether or not a display note is to be generated from the field. These values could be used to control printing. However, field 765 does not print. Nevertheless, you should enter the values as if it does.
  - 0 **Display note.** A note is generated from the data in the linking entry field or from the related record. Use to indicate that field 580 (Linking Entry Complexity Note) is not present.
  - 1 **Do not display note.** A note is not generated from the data in the linking entry field or from the related record. Use 1st indicator value 1 when the display constant associated with the linking field does not adequately describe the relationship. Use field 580 (Linking Entry Complexity Note) for the note.

**2nd Indicator**
- **Display constant controller.** A value that controls the generation of a display constant preceding the data in the linking entry field.
Translation of. A value that generates the display constant Translation of:

8 No display constant generated. A value that specifies that a display constant is not generated. Use subfield ‡i when special introductory text is needed.

Printing

Field 765 does not print. Do not enter Translation of: in field 765.

Definition
Information about the publication in some other language, other than the original, when the target item in the horizontal relationship is the original or another translation. See “76x–78x Linking Entry Fields—Introduction” for more information.

1st Indicator
Note controller. A value that specifies whether or not a display note is to be generated from the field. These values could be used to control printing. However, field 767 does not print. Nevertheless, you should enter the values as if it does.

0  Display note. A note is generated from the data in the linking entry field or from the related record. Use to indicate that field 580 (Linking Entry Complexity Note) is not present.

1  Do not display note. A note is not generated from the data in the linking entry field or from the related record. Use 1st indicator value 1 when the display constant associated with the linking field does not adequately describe the relationship. Use field 580 (Linking Entry Complexity Note) for the note.
2nd Indicator

Display constant controller. A value that controls the generation of a display constant preceding the data in the linking entry field.

® Translated as. A value that generates the display constant Translated as:

8 No display constant generated. A value that specifies that a display constant is not generated. Use subfield ‡i when special introductory text is needed.

Printing

Field 767 does not print. Do not enter Translated as: in field 767.

**Definition**
Information about the related parent record when the target item in a vertical relationship is a single issue, supplement or special issue of the parent item. See “76x-78x Linking Entry Fields–Introduction” for more information.

**1st Indicator**

**Note controller.** A value that specifies whether or not a display note is to be generated from the field. These values could be used to control printing. However, field 772 does not print. Nevertheless, you should enter the values as if it does.

- 0 **Display note.** A note is generated from the data in the linking entry field or from the related record. Use to indicate that field 580 (Linking Entry Complexity Note) is not present.

- 1 **Do not display note.** A note is not generated from the data in the linking entry field or from the related record. Use 1st indicator value 1 when the display constant associated with the linking field does not adequately describe the relationship. Use field 580 (Linking Entry Complexity Note) for the note.
2nd Indicator

Display constant controller. A value that controls the generation of a display constant preceding the data in the linking entry field.

.$. Supplement to. A value that generates the display constant Supplement to:

0 Parent. A value that generates the display constant Parent:

8 No display constant generated. A value that specifies that a display constant is not generated. Use subfield ‡i when special introductory text is needed.

Printing

Field 772 does not print. Do not enter Supplement to: or Parent: in field 772.
**773 Host Item Entry (R)**

‡3 Materials specified  (NR)  Optional/Optional
‡7 Control subfield (NR)  Optional/Optional

**Definition**
Information about the host item for the constituent unit in a vertical relationship described in the record. Field 773 enables the user to locate the physical piece that contains the component part or subunit being described. Include in field 773 only those data elements necessary to assist in the identification of the host item (e.g., links to the bibliographic record describing the item and/or descriptive data that identify the host item). For host items that are serial or multivolume in nature, use subfield ‡g to point to the exact location of the component part within the bibliographic item. See “76x-78x Linking Entry Fields–Introduction” for more information.

1st Indicator  Note controller. A value that specifies whether or not a display note is to be generated from the field.

0  Display note. A note is generated from the data in the linking entry field or from the related record. Use to indicate that field 580 (Linking Entry Complexity Note) is not present.
1 Do not display note. A note is not generated from the data in the linking entry field or from the related record. Use 1st indicator value 1 when the display constant associated with the linking field does not adequately describe the relationship. Use field 580 (Linking Entry Complexity Note) for the note.

2nd Indicator

Display constant controller. A value that controls the generation of a display constant preceding the data in the linking entry field.

b In. A value that generates the display constant In:

8 No display constant generated. A value that specifies that a display constant is not generated. Use subfield ‡i when special introductory text is needed.

Printing

Field 773 prints as a note if the 1st indicator value is 0. Subfields ‡h, ‡m, ‡n, ‡r , ‡u, ‡w, ‡x, ‡y, ‡z and ‡7 do not print.

Field 773 prints as the first note. The print program supplies In at the beginning of the note. The program also supplies parentheses around the contents of subfield ‡k and brackets around the contents of subfield ‡s.

The print program supplies space-dash-space ( -- ) between all subfields after subfield ‡t, i.e., between ‡t and ‡b, between ‡b and ‡d, etc.).

773 0 ‡7 nnam ‡t Great cases of Interpol. ‡b 1st ed. ‡d Pleasantville, N.Y. : Reader’s Digest Association, c1982. ‡w (OCoLC)8451518

Prints in AACR2 records as:

Non-ISBD records. Field 773 prints in the series position after the physical description. If a physical description is not present, field 773 prints as a separate paragraph after the title area. In addition, the program supplies parentheses around the entire note.

Printing with field 580. Use field 580 to print notes if information in 773 cannot generate an intelligible note or if the display constant In is inappropriate. If you use field 580, use value 1 for the 1st indicator in field 773.
### 774 Constituent Unit Entry (R)

**Definition**
Information about a constituent unit associated with a larger bibliographic unit. The constituent unit may be part of a single bibliographic item, a multipart item or a collection. The constituent item may or may not be described in a separate bibliographic record. When a note is generated from this field, it is displayed with an introductory phrase that is generated as a display constant based on the 2nd indicator value. See “76x-78x Linking Entry Fields–Introduction” for more information.

**1st Indicator**
- **Note controller.** A value that specifies whether or not a display note is to be generated from the field. These values could be used to control printing. However, field 774 does not print. Nevertheless, you should enter the values as if it does.
- 0 **Display note.** A note is generated from the data in the linking entry field or from the related record. Use to indicate that field 580 (Linking Entry Complexity Note) is not present.
- 1 **Do not display note.** A note is not generated from the data in the linking entry field or from the related record. Use 1st indicator value 1 when the display
constant associated with the linking field does not adequately describe the relationship. Use field 580 (Linking Entry Complexity Note) for the note.

2nd Indicator

Display constant controller. A value that controls the generation of a display constant preceding the data in the linking entry field.

 Constituent unit. A value that generates the display constant Constituent unit:

  No display constant generated. A value that specifies that a display constant is not generated. Use subfield ‡i when special introductory text is needed.

Printing

Field 774 does not print. Do not enter Constituent unit: in field 774.

**Definition**

Information about the other available editions in a horizontal relationship with the work. Use for the following types of editions:

- **Language editions.** When a serial is issued simultaneously in more than one language by the same publisher, rather than an edition issued by another publisher, use field 775.
- **Regular-print editions.** When the serial being cataloged is a regular-print reprint, use field 775 for the original entry.
- **Other editions.** Use field 775 for other editions of the target item. These editions will generally bear the same title as the target item, but have edition information that distinguishes them.

See “76x-78x Linking Entry Fields–Introduction” for more information.
Note controller. A value that specifies whether or not a display note is to be generated from the field. These values could be used to control printing. However, field 775 does not print. Nevertheless, you should enter the values as if it does.

0 Display note. A note is generated from the data in the linking entry field or from the related record. Use to indicate that field 580 (Linking Entry Complexity Note) is not present.

1 Do not display note. A note is not generated from the data in the linking entry field or from the related record. Use 1st indicator value 1 when the display constant associated with the linking field does not adequately describe the relationship. Use field 580 (Linking Entry Complexity Note) for the note.

Display constant controller. A value that controls the generation of a display constant preceding the data in the linking entry field.

b Other edition available. A value that generates the display constant Other edition available:

8 No display constant generated. A value that specifies that a display constant is not generated. Use subfield ǂi when special introductory text is needed.

Field 775 does not print. Do not enter Other edition available: in field 775.
### 776 Additional Physical Form Entry (R)

#### Input Standards

  - Optional/Optional
- ‡7 Control subfield (NR)
  - Optional/Optional

**Definition**

Information about the immediate predecessor of the target item in a chronological relationship. Repeat field 780 if there is more than one predecessor entry. When a note is generated from this field, it is displayed with an introductory phrase that is generated as a display constant based on the 2nd indicator value. See “76x-78x Linking Entry Fields–Introduction” for more information.

**1st Indicator**

**Note controller.** A value that specifies whether or not a display note is to be generated from the field.

0 **Display note.** A note is generated from the data in the linking entry field or from the related record. Use to indicate that field 580 (Linking Entry Complexity Note) is not present.
1 **Do not display note.** A note is *not* generated from the data in the linking entry field or from the related record. Use 1st indicator value 1 when the display constant associated with the linking field does *not* adequately describe the relationship. Use field 580 (Linking Entry Complexity Note) for the note.

2nd Indicator **Type of relationship.** The relationship between the target item and the preceding entry. These values control the generation of a display constant for a note.

0 **Continues.** The target item *continues* the preceding entry. Use to generate the display constant *Continues:*

```
130 0 Hospitals (Chicago, Ill. : 1936)
780 00 American Hospital Association. ‡t Bulletin of the American Hospital Association ‡w (OCoLC)1777831

*Prints as:*
```

1 **Continues in part.** The target item *continues in part* the preceding entry. Use to generate the display constant *Continues in part:*

```
245 00 Annales scientifiques. ‡p Mathématiques.
780 01 ‡t Annales scientifiques ‡w (OCoLC)6179013

*Prints as:*
Continues in part: Annales scientifiques.
```

2 **Supersedes.** The target item *supersedes* the preceding entry. Use to generate the display constant *Supersedes:*. Use for serials pre-AACR2 cataloging only.

```
245 00 Hespéris tamuda.
780 02 ‡t Hespéris ‡w (OCoLC)1752037

*Prints as:*
Supersedes: Hespéris.
```

3 **Supersedes in part.** The target item *supersedes in part* the preceding entry. Use to generate the display constant *Supersedes in part:*. Use for serials pre-AACR2 cataloging only.

```
245 02 L’Elevage porcin.
780 03 ‡t Elevage

*Prints as:*
Supersedes in part: Elevage.
```

4 **Formed by the union of _____ and _____.** The target item has been formed by the union of one or more titles. Use to generate the display constant *Formed by the union of: _____ and: _____:*

```
245 00 Annales geophysicae.
780 14 ‡t Annales de géophysique. ‡x 0003-4029 ‡w (OCoLC)1481255 ‡w (DLC) 52016346
780 14 ‡t Annali de geofisica ‡w (OCoLC)1847060 ‡w (DLC)gs 49000041

[Note is displayed from field 580 (Linking Entry Complexity Note)]
```
5 Absorbed. The title in hand absorbed the preceding entry. Use to generate the display constant Absorbed:

245 04 The American journal of international law.
780 05 American Society of International Law. ‡t Proceedings ‡g 1971

Prints as:

6 Absorbed in part. The title in hand absorbed in part the preceding entry. Use to generate the display constant Absorbed in part:

245 00 International flight information manual.
780 06 ‡t Graphic notices and supplemental data ‡w (OCoLC)4276671

Prints as:
Absorbed in part: Graphic notices and supplemental data.

7 Separated from. The title in hand separated from the preceding entry. Use to generate the display constant Separated from:

110 2 British Columbia Provincial Museum.
245 10 Two-year review.
780 07 British Columbia. Ministry of Provincial Secretary and Government ‡t Annual report ‡x 0226-0883 ‡w (OCoLC)6270443 ‡w (DLC) 80649039

Prints as:

Printing
Field 780 prints as a note if the 1st indicator value is 0. Subfield ‡i prints as input. Subfields ‡h, ‡m, ‡n, ‡o, ‡r, ‡u, ‡w, ‡y, ‡z and ‡7 do not print. The printing program supplies display constants for field 780. The 2nd indicator determines the display constant.

Pre-AACR2 records. The print program supplies ISSN before the number in subfield ‡x.

780 00 ‡t Behavior science notes ‡x 0005-7886

Prints in pre-AACR2 records as:
Continues: Behavior science notes ISSN 0005-7886
Printing of merged serials. If you use 2nd indicator value 4, the record must have two 780 fields. The first 780 field prints following *Formed by the union of*, the second field 780 prints following *and*:

780 04 ‡t Advances in pharmacology ‡w (OCoLC)1779105
780 04 ‡t Advances in chemotherapy ‡w (OCoLC)1461166

*Prints as:*

Formed by the union of: Advances in pharmacology and: Advances in chemotherapy.

More than two serials merging. If three or more serials were united, enter each 780 field with 1st indicator 1 and 2nd indicator 4. Use field 580 for the necessary notes.
785 Succeeding Entry (R)

### Definition

Information about the immediate successor of the target item in a chronological relationship. Repeat field 785 if there is more than one succeeding entry. When a note is generated from this field, it is displayed with an introductory phrase that is generated as a display constant based on the 2nd indicator value. See “76x-78x Linking Entry Fields—Introduction” for more information.

### 1st Indicator

**Note controller**. A value that specifies whether or not a display note is to be generated from the field.
0 Display note. A note is generated from the data in the linking entry field or from the related record. Use to indicate that field 580 (Linking Entry Complexity Note) is not present.

1 Do not display note. A note is not generated from the data in the linking entry field or from the related record. Use 1st indicator value 1 when the display constant associated with the linking field does not adequately describe the relationship. Use field 580 (Linking Entry Complexity Note) for the note.

2nd Indicator Type of relationship. The relationship between the target item and the succeeding entry. Use the 2nd indicator values to control the generation of a display constant for a note.

0 Continued by. The target item continued by the succeeding entry. Use to generate the display constant Continued by:

245 00 Preliminary seismological bulletin.
785 00 ‡t TEIC quarterly seismological bulletin ‡x 0741-1898 ‡w (DLC)sc 83007721

Prints as:
Continued by: TEIC quarterly seismological bulletin.

If subfield ‡g is included, field 580 (Linking Entry Complexity Note) is required.

130 0 Inside education (Albany, N.Y.)
580 00 Continued in 1983 by: Learning in New York (University of the State of New York).
785 10 ‡t Learning in New York (University of the State of New York) ‡g 1983

[Note is displayed from field 580 (Linking Entry Complexity Note)].

1 Continued in part by. The target item continued in part by the succeeding entry. Use to generate the display constant Continued in part by:

245 04 The Southeastern college art review and newsletter.
785 01 Southeastern College Art Conference. ‡t SECAC newsletter

Prints as:
Continued in part by: Southeastern College Art Conference. SECAC newsletter.

2 Superseded by. The target item superseded by the succeeding entry. Use to generate the display constant Superseded by:. Use for serials pre-AACR2 cataloging only.

245 00 Bulletin of the Vancouver Medical Association.
785 02 British Columbia medical journal. ‡x 0007-0556

Prints as:
Superseded by: British Columbia medical journal. ISSN 0007-0556

3 Superseded in part by. The target item superseded in part by the succeeding entry. Use to generate the display constant Superseded in part by:. Use for serials pre-AACR2 cataloging only.
4 **Absorbed by.** The target item has been *absorbed by* the succeeding entry. Use to generate the display constant *Absorbed by*:

245 04 The Annalist: a magazine of finance, commerce, and economics.
785 04 ‡t Business week ‡g Oct. 1940 ‡x 0007-7135 ‡w (DLC) 31006225

*Prints as:*

Absorbed by: Business week, Oct. 1940.

5 **Absorbed in part by.** The target item has been *absorbed in part* by the succeeding entry. Use to generate the display constant *Absorbed in part by*:

245 04 The Metal worker, plumber, and steam fitter.
785 05 ‡t Sheet metal worker ‡x 0096-9249 ‡w (OCoLC)2054610

*Prints as:*

Absorbed in part by: Sheet metal worker.

6 **Split into ____ and _____.** The target item has *split* into two or more succeeding entries. Use to generate the display constant *Split into: ____ and: ____.*

245 00 Hospital practice.
580 Split into: Hospital practice (Hospital ed.) and, Hospital practice (Office ed.)
785 16 Hospital practice (Hospital ed.) ‡x 8755-4542 ‡w (DLC)sn 84001694
785 16 Hospital practice (Office ed.) ‡x 8750-2836 ‡w (OCoLC)10716242

*[Note is displayed from field 580 (Linking Entry Complexity Note)].*

7 **Merged with ____ to form _____.** The target item has *merged* with another title to form the succeeding entry. Use to generate the display constant *Merged with: ____ to form: ____.*

245 10 Correctional services in Canada.
580 Merged with: Services correctionnels au Canada. ISSN 0711-6810 to form Adult correctional services in Canada. ISSN 0715-2973.
785 17 ‡t Services correctionnels au Canada. ‡x 0711-6810
785 17 ‡t Adult correctional services in Canada.‡x 0715-2973

*[Note is displayed from field 580 (Linking Entry Complexity Note)].*

8 **Changed back to.** The target item has been *changed back to* an earlier form. Use to generate the display constant *Changed back to*:

245 10 Annual report / ‡c Department of City Planning, City of Los Angeles.
785 08 Los Angeles (Calif.). Dept. of City Planning. ‡t Annual report of the Department of City Planning (1966) ‡w (DLC)sn 86032686

*Prints as:*

Changed back to: Los Angeles (Calif.). Dept. of City Planning. Annual report of the Department of City Planning (1966).

**Printing**

Field 785 prints as a note if the 1st indicator value is 0. Subfield ‡i prints as input. Subfields ‡h, ‡m, ‡n, ‡o, ‡r, ‡u, ‡w, ‡y, ‡z and ‡7 do not print. The printing program supplies display constants for field 785. The 2nd indicator determines the display constant.
**Pre-AACR2 records.** The print program supplies ISSN before the number in subfield ‡x.

785 00 ‡t Surface technology ‡x 0376-4583

*Prints in pre-AACR2 records as:*

Continued by: Surface technology ISSN 0376-4583

**Split and merged serials.** If you use 2nd indicator value 6 or 2nd indicator value 7, the record must have at least two 785 fields. The first 785 field prints following the first phrase of the display constant and the second field 785 prints following the second phrase of the display constant.

785 07 ‡t Advances in pharmacology ‡w (OCoLC)1779105

785 07 ‡t Advances in pharmacology and chemotherapy ‡x 0065-3144

*Prints as:*

Merged with: Advances in pharmacology to form: Advances in pharmacology and chemotherapy.

**Three or more serials result from a split.** Enter each 785 field with 1st indicator 1 and 2nd indicator 6. Use field 580 for the necessary notes.

**Three serials merge.** If three or more serials were merged into one or if more than one serial results from a merge, enter each 785 field with 1st indicator 1 and 2nd indicator 7. Use field 580 for the necessary notes.

Definition
Information about the data source to which the described item is related. Use for
information about other files, printed sources or collection procedures. See “76x-
78x  Linking Entry Fields–Introduction” for more information.

1st Indicator  Note controller. A value that specifies whether or not a display note is to be
generated from the field. These values could be used to control printing. However,
field 786 does not print. Nevertheless, you should enter the values as if it does.

0  Display note. A note is generated from the data in the linking entry field or from
the related record. Use to indicate that field 580 (Linking Entry Complexity
Note) is not present.

1  Do not display note. A note is not generated from the data in the linking entry
field or from the related record. Use 1st indicator value 1 when the display
constant associated with the linking field does not adequately describe the
relationship. Use field 580 (Linking Entry Complexity Note) for the note.

**Definition**

Information about a related item when the relationship does not fit any of the other 76x–78x fields. See “76x-78x Linking Entry Fields–Introduction” for more information.

**1st Indicator**  
**Note controller.** A value that specifies whether or not a display note is to be generated from the field. These values could be used to control printing. However, field 787 does not print. Nevertheless, you should enter the values as if it does.

0  **Display note.** A note is generated from the data in the linking entry field or from the related record. Use to indicate that field 580 (Linking Entry Complexity Note) is not present.

1  **Do not display note.** A note is not generated from the data in the linking entry field or from the related record. Use 1st indicator value 1 when the display constant associated with the linking field does not adequately describe the relationship. Use field 580 (Linking Entry Complexity Note) for the note.

**2nd Indicator**  
**Display constant controller.** A value that controls the generation of a display constant preceding the data in the linking entry field.
787 Nonspecific Relationship Entry (R) (cont.)

6 Related item. A value that generates the display constant Related item:

8 No display constant generated. A value that specifies that a display constant is not generated. Use subfield $i$ when special introductory text is needed.

Printing

Field 787 does not print. Do not enter Related item: in field 787.

Definition
Nonstandard name added entries. Use for added entries not supported by cataloging rules (e.g., donor or gift information, theses advisor or variant form). Enter information in field 790 as you would in field 700 (Added Entry–Personal Name).

Note: Alternatively, you may also use field 796 (Local Added Entry–Personal Name). Follow local practice.

Master record retention
Field 790 is not retained in the master record. However, it is retained in archive records, institution records, exported records, and OCLC-MARC records.

1st Indicator Type of personal name entry element. The form of name. These values could be used to facilitate card filing arrangements. However, OCLC does not differentiate among forms of name for sorting cards.

0 Forename. Use for the following types of names:
- Names structured as forenames (direct order)
  790 0 Father Divine.
- Names that consist of initials in direct order
  790 0 R. M. B.
- Characterizing phrases in direct order
  790 0 Author of Allons au ciel.
- If a forename/surname status is in doubt, treat the name as a forename
  790 0 Ram Gopal.

1 **Surname.** Use for the following types of names:
- Names (real or pseudonyms) having any inverted order
  790 1 Carroll, Lewis.
- Names known to be surnames but lacking forenames
  790 1 Smith, ‡c Mrs.
- Names consisting of multiple entry elements that include articles or prepositions (e.g., De, La or Van)
  790 1 Van Buren, Martin.
- Names of persons known under sobriquets and nicknames that have the structure of surnames
  790 1 Q., Mike.

3 **Family name.** Use for the name of a family, clan, dynasty, house or other such group. The name may be constructed in direct or inverted order.
  790 3 Dunlop family.

2nd Indicator

**Type of added entry.** The type of added entry. The values distinguish between no information provided and an analytical entry. These indicators could be used to facilitate card filing arrangements. However, OCLC does not differentiate among types of added entries for sorting cards.

| 100 1 | Gershkoff, Ira. |
| 245 14 | The Boston driver’s handbook : ‡b the big dig edition / ‡c Ira Gershkoff and Richard Trachtman. |
| 790 1 | Gershkoff, Ira. ‡t Wild in the streets. |

2 **Analytical entry.** The item contains the work that is represented by the added entry.

| 100 1 | Bouma, Jelle. |
| 245 10 | Marcus Iunius Nypsus : ‡b Fluminis varatio, Limitis repositio : introduction, text, translation, and commentary / ‡c Jelle Bouma. |
| 790 12 | Nypsus, Marcus Iunius. ‡t Fluminis varatio. ‡t 1993. |
| 790 12 | Nypsus, Marcus Iunius. ‡t Limitis repositio. ‡t 1993. |
Subfields

†a Personal name
A surname and/or forename; abbreviations, initials, letters, numbers or phrases used in place of a name; or a family name. Use subfield ‡e for parenthetical qualifying terms associated with the name. Use subfield ‡q for fuller forms of a name added as a qualifier. Enter a period after initials. Enter one space between initials.

790 1 Smith, W. Zachariah.

‡b Numeration
A Roman numeral alone or a Roman numeral and a subsequent part of a forename. Use only in a forename heading (i.e., entries with 1st indicator value 0).

790 0 Gustaf ‡b II Adolf.

‡c Titles and other words associated with a name
Titles and other words associated with a name. These include qualifying information such as:

- A Roman numeral used with a surname
- Initials of an academic degree or denoting membership in an organization, e.g., F.L.A.
- Terms of address, e.g., Mrs.
- Titles designating rank, office or nobility, e.g., Sir
- Other words or phrases associated with a name, e.g., clockmaker or Saint

790 0 Joseph, ‡c Nez Perc’e Chief.

If the heading is a surname followed directly by a prefix without intervening forenames or forename initials, the prefix is contained in subfield ‡c to prevent its being processed as a forename in searching.

790 1 Walle-Lissnijder, ‡c van de.

If a heading consists of a surname with a title or associated words, enter the title following the surname and preceding any other element of the heading. Use subfield ‡q for fuller forms of names in parentheses.

790 1 Gatti de Gamond, ‡c Madame ‡q (Zoé Charlotte)

Multiple adjacent titles or words associated with a name are contained in a single subfield ‡c. Repeat subfield ‡c only when words associated with a name are separated by subelements contained in other subfields.

790 0 Thomas, ‡c Aquinas, Saint, ‡d 1225?-1274.

Use for other parenthetical additions to a name.

790 0 Taj Mahal ‡c (Musician)

‡d Dates associated with a name
Birth, death or flourished dates used with a name. A qualifier used with the date (e.g., b., d., ca., fl., cent. or ?) is also contained in subfield ‡d.

790 1 Adams, Henry, ‡d 1838-1918.

The print program provides any necessary additional spaces after the hyphen.

790 1 Smith, John, ‡d 1924- ‡c defendant.

Prints as:
Smith, John 1924- defendant.
790 Local Added Entry–Personal Name (R) (cont.)

‡e Relator term
A designation of function that describes the relationship between a name and a work (e.g. collector, comp., defendant, ed., ill., joint author or tr.). Put multiple relator terms in separate subfields.

790 1 Morgan, John Pierpont, ‡d 1837-1913, ‡e collector.

Relator codes, which also specify a relationship of a person to a work, are contained in subfield ‡4.

‡f Date of work
The date of publication used with a title of a work in a name/title heading. A date added parenthetically to a title to distinguish between identical titles entered under the same name is not entered in a separate subfield, except for scores or sound recordings. For music, see subfield ‡n.

790 1 Freud, Sigmund, ‡d 1856-1939. ‡t Selections. ‡f 1978.

‡g Miscellaneous information
Data not identified in another subfield. Unlikely to be used in field 790.

‡h Medium
A media qualifier used with a title of a work in a name/title field.

‡j Attribution qualifier
Attribution information when the responsibility is unknown, uncertain, fictitious or pseudonymous. Use for qualifiers that follow the name of a known artist for the work. Do not use subfield ‡j for headings formulated according to AACR2.

790 1 Reynolds, Joshua, ‡c Sir, ‡d 1723-1792, ‡j Pupil of

‡k Form subheading
A form subheading. Use in the name or title portion. For example, drama, in fiction, poetry, selections, etc.

790 1 Sousa, John Philip, ‡d 1854-1932. ‡t Marches, ‡m band. ‡k Selections (Sousa American bicentennial collection) ; ‡v v. 1.

‡l Language of a work
The name of the language or the term representing the language (e.g., Polyglot) of a work.

790 1 Poe, Edgar Allan, ‡d 1809-1849. ‡t Works. ‡l German. ‡f 1922. ‡s Rosl ; ‡v 1. Bd.

‡m Medium of performance for music
Terms designating the medium of performance used in a uniform title for a work in a name/title field. Enter multiple adjacent elements in a single medium statement in the same subfield ‡m. Repeat subfield ‡m only when medium of performance statements are separated by subelements contained in other subfields.

790 1 Byrd, William, ‡d 1542 or 3-1623. ‡t Masses, ‡m voices (3)

‡n Number of part/section of a work
The number designation for a part/section of a work used with a title in a name/title field. Numbering is an indication of sequencing in any form (e.g., Book two, Part 1 or Supplement A). For music, use the opus, serial or thematic index number or a date used as a number in subfield ‡n. Enter multiple numberings for a part/section separated by a comma (usually alternative numberings) in a single subfield ‡n. Enter multiple numberings for a part/section separated by a period (usually numberings of subparts) in separate subfield ‡n's.

790 1 Haydn, Joseph, ‡d 1732-1809. ‡t Symphonies, ‡n H. I, 103.

‡o Arranged statement for music
The abbreviation arr: used for a uniform title in a name/title field.

790 1 Brahms, Johannes, ‡d 1833-1897. ‡t Variationen über ein Thema von Haydn ; ‡o arr.

**Definition**
Nonstandard corporate added entries. Use for added entries not supported by cataloging rules (e.g., donor or gift information or variant form). Enter information in field 791 as you would in field 710 (Added Entry–Corporate Name). Note: Alternatively, you may also use field 797 (Local Added Entry–Corporate Name). Follow local practice.

**Master record retention**
Field 791 is not retained in the master record. However, it is retained in archive records, institution records, exported records, and OCLC-MARC records.

**1st Indicator**  Type of corporate name entry element. The form of name. These values could be used to facilitate card filing arrangements. However, OCLC does not differentiate among forms of name for sorting cards.

- 0  Inverted name. Pre-AACR2 headings in inverted order.

791 0  Little (Arthur D.) inc.  
[Pre-AACR2.]
1 Jurisdiction name. Jurisdictions may be ecclesiastical entities or the jurisdiction name under which you enter a corporate name, a city section or a title of a work (e.g. France or New York (N.Y.) ). Corporate names containing a name of a jurisdiction as an integral part of the name or qualified by a jurisdiction name are identified by 1st indicator value 2.

791 1 Fulda (Germany: Ecclesiastical principality)

2 Name in direct order. Corporate names entered in direct order. These headings may also have a parenthetical qualifier or may be an acronym or initialism.

791 2 Berlitz Schools of Languages of America.

2nd Indicator Type of added entry. The type of added entry. The values distinguish between no information provided and an analytical entry. These indicators could be used to facilitate card filing arrangements. However, OCLC does not differentiate among types of added entries for sorting cards.

b No information provided. Either the added entry is not for an analytic or no information is provided as to whether the added entry is for an analytic.

100 1 Gotshaw, F. Marco.
245 10 Journeyman’s guide to the National Electrical Code / ¤c Furman Marco Gotshaw.

2 Analytical entry. The item contains the work that is represented by the added entry.

100 1 Fernandez, Perfecto V.
245 10 Primer on labor law, 1982-92 / ¶c Perfecto V. Fernandez.
500 Includes text of the Philippines labor relations law.
791 12 Philippines. ¶t Labor code of the Philippines. ¶n Book 5, ¶p Labor relations. ¶f 1981.

Subfields ¶a Corporate name or jurisdiction name as entry element

Name of a corporate body or the first entity when subordinate units are present; a jurisdiction name under which a corporate body, city section or title of a work is entered; or a jurisdiction name that is also an ecclesiastical entity.

791 2 Art Nouveau, Inc.
Enter parenthetical qualifying information, jurisdiction names or dates (other than the date of a meeting) in parenthesis in subfield ¶a.

791 1 Berlin (Germany)
Enter one space between an initial and a noninitial. Do not enter a space between initials.

791 2 F & H Denby.

¶b Subordinate unit

Corporate names or corporate subheadings that follow the name of the highest hierarchical unit (subfield ¶a). Enter each subordinate unit in a separate subfield ¶b.

791 2 Curtis Publishing Company. ¶b Research Dept.
**791 Local Added Entry–Corporate Name (R) (cont.)**

Enter a date, number or place that follows a corporate name and is separated from the name by a comma in the same subfield.

791 1 United States. ‡b Army. ‡b Corps, IV.

Enter parenthetical qualifying information associated with the subordinate unit also in subfield ‡b.

791 1 United States. ‡b President (1953-1961 : Eisenhower)

**Definition**
Nonstandard uniform title added entries. Use for added entries not supported by cataloging rules (e.g., donor or gift information or variant form). Enter information in field 793 as you would in field 730 (Added Entry–Uniform Title). **Note:** Alternatively, you may also use field 799 (Local Added Entry–Uniform Title). Follow local practice.

**Master record retention**
Field 793 is not retained in the master record. However, it is retained in archive records, institution records, exported records, and OCLC-MARC records.

**1st Indicator**
Nonfiling characters. The number of character positions associated with a definite or indefinite article (e.g., An or The) at the beginning of a title and that are disregarded in sorting and filing processes.

Current practice is to enter the title without articles and use 1st indicator value 0.

0 No nonfiling characters. No initial article character positions are disregarded. Use value 0 if the title does not begin with an article.

793 0 Collection africaine.

Diacritical marks or special characters at the beginning of a series statement field that does not begin with an initial article are not counted as nonfiling characters.

793 0 Ökonomische Studien ; ‡v Bd. 22.
1-9 **Number of nonfiling characters present.** A field begins with a definite or indefinite article that is disregarded in sorting and filing processes. Enter the number of characters in the article, plus spaces, punctuation, diacritical marks and special characters that precede the first significant word.

Any diacritical mark or special character associated with the first filing character is **not** included in the count of nonfiling characters.

2nd Indicator **Type of added entry.** The type of added entry. The values distinguish between no information provided and an analytical entry. These indicators could be used to facilitate card filing arrangements. However, OCLC does not differentiate among types of added entries for sorting cards.

- **b No information provided.** Either the added entry is **not** for an analytic or no information is provided as to whether the added entry is for an analytic.

2 Analytical entry. The item contains the work that is represented by the added entry.

- **b 100 1 Barwise, Jon.**
- **b 245 00 Chemical pricing patterns: §b comparisons of annual high and low prices for 1,250 key chemicals and related process materials for the years of 1952...**
- **b 500 30 Head of title: Oil, paint and drug reporter.**
- **b 793 0 Oil, paint and drug reporter.**

**Subfields**

- **†a Uniform title**
  The uniform title. Enter parenthetical information added to make a title distinctive in subfield †a. Use subfield †d to record the date of signing added to a uniform title for a treaty.

- **b 793 0 Genesis (Anglo-Saxon poem)**

- **†d Date of treaty signing**
  The date of signing for a treaty or other intergovernmental agreement.

- **b 793 0 Treaty of Utrecht †d (1713)**

- **†f Date of a work**
  The date of publication used with a title of a work.

- **b 793 0 Bible. †f English. †s Anchor Bible. †f 1964.**

- **†g Miscellaneous information**
  Data **not** identified in other subfields.

- **b 793 0 Bible. †g Manuscripts, Latin. †p N.T. †p Gospels (Lindisfarne gospels)**

- **†h Medium**
  A media qualifier used with a title of a work in a name/title field.

- **b 793 0 Bible. †h O.T. †h Five Scrolls. †h Hebrew. †s Biblioteca apostolica vaticana. †h Manuscript. †h Urbiniti Hebraicus 1.**

- **†l Language of a work**
  The name of the language or the term representing the language (e.g., Polyglot) of a work.

- **b 793 0 Lord’s prayer. †l Polyglot.**
793  Local Added Entry–Uniform Title (R)  (cont.)

‡m Medium of performance for music
Terms designating the medium of performance.

793 0 Concertos, ‡m violin, string orchestra,
[Uniform title heading is used for a work of unknown authorship.]

‡n Number of part/section of a work
The number designation for a part/section of a work. Numbering is defined as an
indication of sequencing in any form (e.g., Book two, Part 1 or Supplement A).
Separate multiple numberings with a comma.

793 0 Notenbüchlein für Anna Magdalena Bach ‡n (1725)

‡o Arranged statement for music
The abbreviation arr. used in a uniform title field.

793 0 God save the king; ‡o arr. ‡f 1982.

‡p Name of part/section of a work
A name designation of a part/section of a work.

793 0 Bible. ‡p O.T. ‡l Hebrew. ‡f 1990.

‡r Key for music
The statement of key in which the music is written.

793 0 Concertos, ‡m violin, string orchestra, ‡r D major.

‡s Version
The versions, edition, etc., information.

793 0 Bible. ‡l English. ‡s Roche. ‡r Selections. ‡f 1990.

‡t Title of a work
The title page title of a work. Unlikely to be used in field 793

‡x International Standard Serial Number
The International Standard Serial Number (ISSN) for a serial title given in the title
portion of a name/title field. The ISSN is an agency-assigned data element.

The print program provides ISSN before the number in printed series statements.
The ISSN does not print in the series tracing or added entry.

‡3 Materials specified
The part of the described materials to which the field applies.

‡5 Institution to which field applies
A code of the institution or organization that holds the copy to which the field
applies. Use for notes that do not apply to the universal description of the item. See
MARC Code List for Organizations (http://www.loc.gov/marc/organizations/ orgshome.html) or Symbols and Interlibrary Loan Policies in Canada (http://www.nlc-bnc.ca/6/16/s16-202-e.html).

793 0 Index librorum prohibitorum. ‡f 1570. ‡5 [MARC organization symbol]

Printing
Field 793 prints as a heading and tracing. Subfields ‡x, ‡3 and ‡5 do not print. In
the tracing paragraph, the print program supplies consecutive Roman numerals for
added entry tracings.

Definition
Nonstandard name added entries. Use for added entries not supported by cataloging rules (e.g., donor or gift information, theses advisor or variant form). Enter information in field 796 as you would in field 700 (Added Entry–Personal Name). Note: Alternatively, you may also use field 790 (Local Added Entry–Personal Name). Follow local practice.

Master record retention
Field 796 is not retained in the master record. However, it is retained in archive records, institution records, exported records, and OCLC-MARC records.

1st Indicator  Type of personal name entry element. The form of name. These values could be used to facilitate card filing arrangements. However, OCLC does not differentiate among forms of name for sorting cards.
0 Forename. Use for the following types of names:

- Names structured as forenames (direct order)
  796 0 Father Divine.

- Names that consist of initials in direct order
  796 0 R. M. B.

- Characterizing phrases in direct order
  796 0 Author of Allons au ciel.

- If a forename/surname status is in doubt, treat the name as a forename
  796 0 Ram Gopal.

1 Surname. Use for the following types of names:

- Names (real or pseudonyms) having any inverted order
  796 1 Carroll, Lewis.

- Names known to be surnames but lacking forenames
  796 1 Smith, ‡c Mrs.

- Names consisting of multiple entry elements that include articles or prepositions (e.g., De, La or Van)
  796 1 Van Buren, Martin.

- Names of persons known under sobriquets and nicknames that have the structure of surnames
  796 1 Q., Mike.

3 Family name. Use for the name of a family, clan, dynasty, house or other such group. The name may be constructed in direct or inverted order.

  796 3 Dunlop family.

2nd Indicator

Type of added entry. The type of added entry. The values distinguish between no information provided and an analytical entry. These indicators could be used to facilitate card filing arrangements. However, OCLC does not differentiate among types of added entries for sorting cards.

b No information provided. Either the added entry is not for an analytic or no information is provided as to whether the added entry is for an analytic.

  100 1 Gershkoff, Ira.
  245 14 The Boston driver’s handbook : ‡b the big dig edition / ‡c Ira Gershkoff and Richard Trachtman.
  796 1 Gershkoff, Ira. ‡t Wild in the streets.
2 Analytical entry. The item contains the work that is represented by the added entry.

100 1 Bouma, Jelle.
245 10 Marcus Iunius Nypsus: ‡b Fluminis varatio, Limitis repositio: introduction, text, translation, and commentary / ‡c Jelle Bouma.
796 12 Nypsus, Marcus Iunius. ‡t Fluminis varatio. ‡f 1993.
796 12 Nypsus, Marcus Iunius. ‡t Limitis repositio. ‡f 1993.

Subfields

‡a Personal name
A surname and/or forename; abbreviations, initials, letters, numbers or phrases used in place of a name; or a family name. Use subfield ‡c for parenthetical qualifying terms associated with the name. Use subfield ‡q for fuller forms of a name added as a qualifier. Enter a period after initials. Enter one space between initials.

796 1 Smith, W. Zachariah.

‡b Numeration
A Roman numeral alone or a Roman numeral and a subsequent part of a forename. Use only in a forename heading (i.e., entries with 1st indicator value 0).

796 0 Gustaf ‡b II Adolf.

‡c Titles and other words associated with a name
Titles and other words associated with a name. These include qualifying information such as:

- A Roman numeral used with a surname
- Initials of an academic degree or denoting membership in an organization, e.g., F.L.A.
- Terms of address, e.g., Mrs.
- Titles designating rank, office or nobility, e.g., Sir
- Other words or phrases associated with a name, e.g., clockmaker or Saint

796 0 Joseph, ‡c Nez Percé Chief.

If the heading is a surname followed directly by a prefix without intervening forenames or forename initials, the prefix is contained in subfield ‡c to prevent its being processed as a forename in searching.

796 1 Walle-Lissnijder, ‡c van de.

If a heading consists of a surname with a title or associated words, enter the title following the surname and preceding any other element of the heading. Use subfield ‡q for fuller forms of names in parentheses.

796 1 Gatti de Gamond, ‡c Madame ‡q (Zöe Charlotte)

Multiple adjacent titles or words associated with a name are contained in a single subfield ‡c. Repeat subfield ‡c only when words associated with a name are separated by subelements contained in other subfields.

796 0 Thomas, ‡c Aquinas, Saint, ‡d 1225?-1274.

Use for other parenthetical additions to a name.

796 0 Taj Mahal ‡c (Musician)

Definition
Nonstandard corporate added entries. Use for added entries not supported by cataloging rules (e.g., donor or gift information or variant form). Enter information in field 797 as you would in field 710 (Added Entry–Corporate Name). Note: Alternatively, you may also use field 791 (Local Added Entry–Corporate Name). Follow local practice.

Master record retention
Field 797 is not retained in the master record. However, it is retained in archive records, institution records, exported records, and OCLC-MARC records.

1st Indicator
Type of corporate name entry element. The form of name. These values could be used to facilitate card filing arrangements. However, OCLC does not differentiate among forms of name for sorting cards.

0  Inverted name. Pre-AACR2 headings in inverted order.

797 0  Little (Arthur D.) inc.
[Pre-AACR2.]
1 Jurisdiction name. Jurisdictions may be ecclesiastical entities or the jurisdiction name under which you enter a corporate name, a city section or a title of a work (e.g. France or New York (N.Y.)). Corporate names containing a name of a jurisdiction as an integral part of the name or qualified by a jurisdiction name are identified by 1st indicator value 2.

797 1 Fulda (Germany : Ecclesiastical principality)

2 Name in direct order. Corporate names entered in direct order. These headings may also have a parenthetical qualifier or may be an acronym or initialism.

797 2 Berlitz Schools of Languages of America.

2nd Indicator

Type of added entry. The type of added entry. The values distinguish between no information provided and an analytical entry. These indicators could be used to facilitate card filing arrangements. However, OCLC does not differentiate among types of added entries for sorting cards.

b No information provided. Either the added entry is not for an analytic or no information is provided as to whether the added entry is for an analytic.

100 1 Gotshaw, F. Marco.
245 10 Journeyman’s guide to the National Electrical Code / ‡c Furman Marco Gotshaw.

2 Analytical entry. The item contains the work that is represented by the added entry.

100 1 Fernandez, Perfecto V.
245 10 Primer on labor law, 1982-92 / ‡b Perfecto V. Fernandez.
500 Includes text of the Philippines labor relations law.
797 12 Philippines. ‡t Labor code of the Philippines. ‡n Book 5, ‡p Labor relations. ‡f 1981.

Subfields

‡a Corporate name or jurisdiction name as entry element

Name of a corporate body or the first entity when subordinate units are present; a jurisdiction name under which a corporate body, city section or title of a work is entered; or a jurisdiction name that is also an ecclesiastical entity.

797 2 Art Nouveau, Inc.

Enter parenthetical qualifying information, jurisdiction names or dates (other than the date of a meeting) in parenthesis in subfield ‡a.

797 1 Berlin (Germany)

Enter one space between an initial and a noninitial. Do not enter a space between initials.

797 2 F & H Denby.
797 2 W.H. Ross Foundation for the Study of Prevention of Blindness.

‡b Subordinate unit

Corporate names or corporate subheadings that follow the name of the highest hierarchical unit (subfield ‡a). Enter each subordinate unit in a separate subfield ‡b.

797 2 Curtis Publishing Company. ‡b Research Dept.
Enter a date, number or place that follows a corporate name and is separated from the name by a comma in the same subfield.

797 1 United States. ‡b Army. ‡b Corps, IV.

Enter parenthetical qualifying information associated with the subordinate unit also in subfield ‡b.

797 1 United States. ‡b President (1953-1961 : Eisenhower)

‡c Location of meeting
Place name or a name of an institution where a meeting was held. Use a single subfield ‡c for multiple adjacent locations.

797 2 Labour Party (Great Britain). ‡b Conference ‡n (71st : ‡c Blackpool, Lancashire, England)

‡d Date of meeting or treaty signing
The date a meeting was held or date a treaty was signed.

797 1 United States. ‡b Congress ‡n (87th, 2nd session : ‡d 1962)

‡e Relator term
A designation of function that describes the relationship between a name and a work (e.g., defendants). Put multiple relator terms in separate subfields.

797 2 Eastman Kodak Company, ‡e defendant-appellant.

Relator codes, which also specify a relationship of a corporate body to a work, are contained in subfield ‡4.

‡f Date of work
The date of publication used with a title of a work in a name/title field. A date added parenthetically to a title to distinguish between identical titles entered under the same name is not entered in a separate subfield, except for scores or sound recordings. See subfield ‡n.

797 1 France. ‡t Constitution (1946)

‡g Miscellaneous information
Data not identified in other subfields. Use for subelements that are not more appropriately contained in subfields ‡c, ‡d or ‡n.

797 1 Great Britain. ‡t Treaties, etc. ‡g Ireland, ‡d 1985 Nov. 15.

‡h Medium
A media qualifier used with a title of a work in a name/title field.

‡k Form subheading
Standardized phrases added to a heading to gather records for certain kinds of materials. Form subheadings include: Manuscript; Protocols, etc.; Selections.

797 2 Daughters of the American Revolution. ‡b Mary Clap Wooster Chapter (New Haven, Conn.). ‡k Charters and regulations.

‡l Language of a work
The name of the language or the term representing the language (e.g., Polyglot) of a work.

797 2 Biblioteca apostolica Vaticana. ‡k Manuscript. ‡n Vat. Lat. 2710. ‡l English.

‡m Medium of performance for music
Terms designating the medium of performance used in a uniform title for a work in a name/title heading. Unlikely to be used in field 797.

‡n Number of part/section/meeting
The number of a meeting that is entered under a corporate name. Use also for a number designation for a part/section of a work used with a title in a name/title field. Numbering is an indication of sequencing in any form (e.g., Book two, Part 1 or
Supplement A). For music, use the opus, serial or thematic index number or a date used as a number in subfield ‡n.

797 2 Corpus Christi College (University of Cambridge). ‡b Library ‡k Manuscript. ‡n 1957.

Enter multiple numberings for a part/section separated by a comma (usually alternative numberings) in a single subfield ‡n. Enter multiple numberings for a part/section separated by a period (usually numberings of subparts) in separate subfield ‡n’s.

797 1 United States. ‡b Congress ‡n (87th, 2nd session : ‡d 1962)

‡o Arranged statement for music
The abbreviation arr. used in a uniform title for a work in a name/title field. Unlikely to be used in field 797.

‡p Name of part/section of a work
A name designation of a part/section of a work. Use also for a name designation following the form subdivision Manuscript.

797 2 United States Strategic Bombing Survey. ‡t Reports. ‡p Pacific war ‡p Indexes.

‡r Key for music
The statement of key in which the music is written used in a uniform title for a work in a name/title field. Unlikely to be used in field 797.

‡s Version
The version, edition, etc., information used with a title of a work in a name/title field.

‡t Title of a work
A uniform title, title page title of a work or series title used in a name/title field.

797 1 California. ‡b University. ‡t University of Los Angeles. ‡b Institute of Government and Public Affairs. ‡t MR.

‡u Affiliation
The affiliation or address of the name in subfield ‡a.

797 2 Industrial Environmental Research Laboratory. ‡u Research Triangle Park, N.C.

‡x International Standard Serial Number
The International Standard Serial Number (ISSN) for a serial title given in the title portion of a name/title field. The ISSN is an agency-assigned data element.

The print program provides ISSN before the number in printed series statements. The ISSN does not print in the series tracing or added entry.

‡3 Materials specified
The part of the described materials to which the field applies.

‡4 Relator code
A three-character code that indicates the relationship of the entry to the item. More than one relator code may be used if the corporate name has more than one function. The code is given after the name portion in name/title fields. Put multiple relator codes in separate subfields. See MARC Code Lists for Relators, Sources, Descriptive Conventions (http://www.loc.gov/marc/relators/relahome.html).

797 1 United States. ‡b Energy Research and Development Administration. ‡t 4 fnl

Relator terms, which also specify a relationship of a corporate body to a work, are contained in subfield ‡e.

‡5 Institution to which field applies
A code of the institution or organization that holds the copy to which the field applies. Use for notes that do not apply to the universal description of the item. See
**797 Local Added Entry–Corporate Name (R)** *(cont.)*

*MARC Code List for Organizations* (http://www.loc.gov/marc/organizations/orgshome.html) or *Symbols and Interlibrary Loan Policies in Canada* (http://www.nlc-bnc.ca/6/16/s16-202-e.html).

797 2 Bridgewater Library, ‡e former owner. ‡5 NjP

‡9 Special entry

This subfield is user defined.

Printing

Field 797 prints as a heading and tracing. Subfields ‡u, ‡x, ‡3, ‡4 and ‡5 do not print. In the tracing paragraph, the print program supplies consecutive Roman numerals for added entry tracings.

**Definition**
Nonstandard meeting name added entries. Use for added entries not supported by cataloging rules (e.g., donor or gift information or variant form). Enter information in field 798 as you would in field 711 (Added Entry–Meeting Name). Note: Alternatively, you may also use field 792 (Local Added Entry–Meeting Name). Follow local practice.

**Master record retention**
Field 798 is not retained in the master record. However, it is retained in archive records, institution records, exported records, and OCLC-MARC records.

**1st Indicator** Type of meeting name entry element. The form of name. These values could be used to facilitate card filing arrangements. However, OCLC does not differentiate among forms of name for sorting cards.

- **0 Inverted name.** Pre-AACR2 headings in inverted order.

  798 0 Smith (David Nichol) Memorial Seminar.
1 Jurisdiction name. Pre-AACR2 headings for a conference name entered under ecclesiastical entities or the jurisdiction names under which you enter a corporate name, a city section or a title of a work.

798 1 Chicago. ℹ Cartography Conference.

2 Name in direct order. Conference names entered in direct order. These headings may also have a parenthetical qualifier or may be an acronym or initialism.

798 2 Festival of Britain.

2nd Indicator

Type of added entry. The type of added entry. The values distinguish between no information provided and an analytical entry. These indicators could be used to facilitate card filing arrangements. However, OCLC does not differentiate among types of added entries for sorting cards.

♭ No information provided. Either the added entry is not for an analytic or no information is provided as to whether the added entry is for an analytic.

245 00 Neoplatonism and gnosticism / ℹ Richard T. Wallis, editor, Jay Bregman, associate editor.

798 2 International Conference on Neoplatonism and Gnosticism ℹ (1984 : ℹ University of Oklahoma)

2 Analytical entry. The item contains the work that is represented by the added entry.

Subfields

♭a Meeting name or jurisdiction name as entry element

Name of a meeting or a jurisdiction name under which a meeting is entered. Enter parenthetical qualifying information in subfield ♭a. Enter parenthetical qualifying information in parenthesis in subfield ♭a.

798 2 Expo 67 ℹ (Montréal, Qu´ébec)

♭c Location of meeting

Place name or a name of an institution where a meeting was held. Use a single subfield ♭c for multiple adjacent locations.

798 2 Festival of Britain ℹ (1951 : ℹ London, England)

♭d Date of meeting

The date a meeting was held.

798 2 Biennale di Venezia ℹ (36th : ℹ 1972)

♭e Subordinate unit

A name of a subordinate unit entered under a meeting name.

798 2 Mostly Mozart Festival. ℹ Orchestra.
Local Added Entry–Meeting Name (R) (cont.)

‡f Date of a work
The date of publication used with a title of a work in a name/title field. Do not use subfield ‡f for dates added parenthetically to a meeting to distinguish between identical names.

798 2 International Symposium on Quality Control (1974-)

‡g Miscellaneous information
Data not identified in other subfields.

798 2 National Conference on Physical Measurement of the Disabled, ‡n 2nd, ‡c Mayo Clinic ‡d 1981, ‡g Projected, not held.

‡h Medium
A media qualifier used with a title of a work in a name/title field.

‡k Form subheading
A form subheading used with a title of a work in a name/title field. The term Selections is a form subheading used with meeting names.

798 2 Council of Trent, ‡n 2nd, ‡d (1545-1563). ‡t Canones et decreta. ‡l English. ‡k Selections. ‡f 1962.

‡l Language of a work
The name of the language or the term representing the language (e.g., Polyglot) of a work.

798 2 Governor’s Conference on Aging (N.Y.) ‡l English.

‡n Number of part/section/meeting
The number of a meeting. Also the number designation for a part/section of a work. Numbering is an indication of sequencing in any form (e.g., Book two, Part 1 or Supplement A).

798 2 Asian Games ‡n (9th : ‡d 1982 : ‡c Delhi, India)

‡p Name of part/section of a work
A name designation of a part/section of a work in a name/title field.

798 2 International Conference on Gnosticism ‡d (1978 : ‡c New Haven, Conn.). ‡t Rediscovery of Gnosticism. ‡p Modern writers.

‡q Name of meeting following jurisdiction name entry element
The meeting name entered under a jurisdiction name contained in subfield ‡a. Pre-AACR2 headings only.

‡s Version
The version, edition, etc., information added to a title of a work in a name/title field. Unlikely to be used in field 798.

‡t Title of a work
A uniform title, a title page title of a work or a series title used in a name/title field.

798 2 Vatican Council ‡n (2nd : ‡d 1962-1965). ‡t Decretum de presbyterorum ministerio et vita.

‡u Affiliation
The affiliation or address of the name in subfield ‡a.

‡x International Standard Serial Number
The International Standard Serial Number (ISSN) for a serial title given in the title portion of a name/title field. The ISSN is an agency-assigned data element.

The print program provides ISSN before the number in printed series statements. The ISSN does not print in the series tracing or added entry.

‡3 Materials specified
The part of the described materials to which the field applies.

‡4 Relator code
A three-character code that indicates the relationship of the name to a work. The code is given after the name portion in name/title fields. Put multiple relator codes in separate subfields. See MARC Code Lists for Relators, Sources, Descriptive Conventions (http://www.loc.gov/marc/relators/relahome.html).

798 2 Festivals Debussy. ‡e Grand orchestre. ‡4 prf
798 Local Added Entry–Meeting Name (R) (cont.)

‡5 Institution to which field applies
A code of the institution or organization that holds the copy to which the field applies. Use for notes that do not apply to the universal description of the item. See MARC Code List for Organizations (http://www.loc.gov/marc/organizations/orgshome.html) or Symbols and Interlibrary Loan Policies in Canada (http://www.nlc-bnc.ca/6/16/s16-202-e.html).

798 2 International Conference on Cataloguing Principles ‡d (1961 : ‡c Paris, France). ‡e Organizing Committee. ‡5 NjP

‡9 Special entry
This subfield is user defined.

Printing
Field 798 prints as a heading and tracing. Subfields ‡u, ‡x, ‡3, ‡4 and ‡5 do not print. In the tracing paragraph, the print program supplies consecutive Roman numerals for added entry tracings.

Definition
Nonstandard uniform title added entries. Use for added entries not supported by cataloging rules (e.g., donor or gift information or variant form). Enter information in field 799 as you would in field 730 (Added Entry–Uniform Title). Note: Alternatively, you may also use field 793 (Local Added Entry–Uniform Title). Follow local practice.

Master record retention
Field 799 is not retained in the master record. However, it is retained in archive records, institution records, exported records, and OCLC-MARC records.

1st Indicator  Nonfiling characters. The number of character positions associated with a definite or indefinite article (e.g., An or The) at the beginning of a title and that are disregarded in sorting and filing processes.

Current practice is to enter the title without articles and use 1st indicator value 0.

0 No nonfiling characters. No initial article character positions are disregarded. Use value 0 if the title does not begin with an article.

799 0 Collection africaine.

Diacritical marks or special characters at the beginning of a series statement field that does not begin with an initial article are not counted as nonfiling characters.

799 0 Ökonomische Studien ; ‡v Bd. 22.
1-9 Number of nonfiling characters present. A field begins with a definite or indefinite article that is disregarded in sorting and filing processes. Enter the number of characters in the article, plus spaces, punctuation, diacritical marks and special characters that precede the first significant word.

Any diacritical mark or special character associated with the first filing character is not included in the count of nonfiling characters.

2nd Indicator

Type of added entry. The type of added entry. The values distinguish between no information provided and an analytical entry. These indicators could be used to facilitate card filing arrangements. However, OCLC does not differentiate among types of added entries for sorting cards.

b No information provided. Either the added entry is not for an analytic or no information is provided as to whether the added entry is for an analytic.

2 Analytical entry. The item contains the work that is represented by the added entry.

Subfields

‡a Uniform title
The uniform title. Enter parenthetical information added to make a title distinctive in subfield ‡a. Use subfield ‡d to record the date of signing added to a uniform title for a treaty.

799 0 Genesis (Anglo-Saxon poem)

‡d Date of treaty signing
The date of signing for a treaty or other intergovernmental agreement.

799 0 Treaty of Utrecht ‡d (1713)

‡f Date of a work
The date of publication used with a title of a work.

799 0 Bible. ‡l English. ‡s Anchor Bible. ‡f 1964.

‡g Miscellaneous information
Data not identified in other subfields.

799 0 Bible. ‡g Manuscripts, Latin. ‡p N.T. ‡p Gospels (Lindisfarne gospels)

‡h Medium
A media qualifier used with a title of a work in a name/title field.

799 0 Bible. ‡p O.T. ‡p Five Scrolls. ‡l Hebrew. ‡s Biblioteca apostolica vaticana. ‡k Manuscript. ‡n Urbiniti Hebraicus 1.

‡l Language of a work
The name of the language or the term representing the language (e.g., Polyglot) of a work.

799 0 Lord’s prayer. ‡l Polyglot.
